

# INSTRUCTION MANUAL

## Universal Tablet Mount - ISSH6501

Loosen the thumb screws on the post mounts enough to allow the mounts to fit over the headrest posts.

Position the support arm to provide additional stability to the mount.

Clip the tablet holder into the mount and secure by sliding the two pieces together until you hear or feel it click.

Position the mount to the proper viewing position, then tighten the thumb screws to secure the mount to the headrest.

Adjust holder arms and foot to the proper width and height for the tablet.

Insert the tablet by placing the bottom side against one arm grip, then swinging the top into position.

⑦ To remove the tablet, simply reverse step 6.
