

Meet your home's new personal assistant: NuBryte Touchpoint!

NuBryteTouchpoint is an all-in-one smart home solution that provides advanced lighting automation, security monitoring with live video feeds and a variety of exciting household management tools. An easy upgrade to your existing light switches. It is the smart home solution that offers a modern secure communication tool for active households.

Product Features:

Advanced Lighting

Morning Light awakens you naturally to brightening light.

Vacation Light simulates lighting habits when the home is empty, deterring intruders.

Welcome Light greets you with your preferred lighting.

Bedtime gradually softens lighting, helping prepare you for sleep.

Night Light provides gentle light for late-night stirrings based on motion.

Easy Off: If a room is not being used, NuBryte Touchpoint will turn the lights off for you.

Complete Home Control: Control your home's lighting from any of your NuBryte Touchpoints, from your couch, or from around the world via the NuBryte mobile App.

Household Management

Family Calendar and household management tool, featuring in-room notifications and reminders. **Household Intercom System** for easy room-to-room communication. **Energy Reporting** provides daily & weekly reports for lighting energy usage and cost in a simple, easy-to-read format.

Home Security Monitoring

Receive **Live Video Alerts** while you are away with the 2 megapixel, wide angle **Security Camera** that records intruders activity, triggers **Light and Sound Alarms** and sends automatic, real-time notification to your smart phone. **Manual Camera Shield** for privacy. **No Subscription Fees**
