Commitment to 3
Quality

- Please refer to the 'Safety Precautions' before use for details on how to stay safe and prevent damage.
- This RAYCOP is specifically designed for the US market. The use of this RAYCOP outside of US is not recommended.
- The exterior and specifications of this product are subject to change without prior notice.
- Keep this instruction manual for future reference.

UV Lamp Safety Sensor

- A safety feature that automatically turns off the UV lamp when your device is moved away from the surface. The UV lamp is automatically turned back on when your device is moved close to the surface again.

Run Time Control System

- After 29 minutes, an alarm begins to sound and the power button lamp flashes to warn you that RAYCOP will automatically switch OFF after 30 minutes.

HEPA Filter Replacement Alert

- RAYCOP will alert you when it is time to replace the HEPA filter. You will hear 5 alert chimes, and the red light on the power button (start flashing). This alert typically occurs after every 60 hours of use.

Motor Overheat Protection Operation

- If your device is continuously used for 30 minutes, the motor overheating prevention device automatically stops suction to prevent overheating the motor. This may occur if the fabric filter of the dust box is clogged with dust.

UV (Ultraviolet) Light Blocking Feature

- Minimizes UV emitted to areas other than the area being cleaned.

Safety Precautions

All RAYCOP products are designed with the highest safety standards. **IMPORTANT SAFETY INSTRUCTIONS.** Read all instructions before using

 **WARNING :** To reduce the risk of fire, electric shock, or injury:

USE

- Do not leave appliance when plugged in. Unplug from outlet when not in use and before servicing.
- Do not use outdoors or on wet surfaces
- Do not allow to be used as a toy. Pay close attention when used by or near children.
- Use only as described in this manual. Use only manufacturer's recommended attachments.
- Do not use with damaged cord or plug. If appliance is not working as it should, has been dropped, damaged, left outdoors, or dropped into water, return it to a service center.
- Do not pull or carry by cord, use cord as a handle, close a door on cord, or pull cord around sharp edges or corners. Do not run appliance over cord. Keep cord away from heated surfaces.
- Do not unplug by pulling on cord. To unplug, grasp the plug and pull, not the cord.
- Do not handle plug or appliance with wet hands.
- Do not put any object into openings. Do not use with any opening blocked; keep free of dust, lint, hair, and anything that may reduce air flow.
- Keep hair, loose clothing, fingers, and all parts of body away from openings and moving parts.
- Turn off all controls before unplugging.
- Do not use to pick up flammable or combustible liquids, such as gasoline, or use in areas where they may be present.
- Always turn off this appliance before connecting or disconnecting motorized nozzle.
- Do not pick up anything that is burning or smoking, such as cigarettes, matches, or hot ashes.
- Do not use without dust box and/or filters in place.

SAVE THESE INSTRUCTIONS

- To reduce the risk of electric shock, this appliance has a polarized plug (one blade is wider than the other). This plug will fit in a polarized outlet only one way. If the plug does not fit fully in the outlet, reverse the plug. If it still does not fit, contact a qualified electrician to install the proper outlet. Do not change the plug in any way.

UV Lamp Caution

- Direct exposure to ultraviolet radiation can cause serious burns to the skin and eyes.
- Do not touch the UV lamp during or immediately after use.
- Do not directly emit the ultraviolet light from the UV lamp towards the eyes or skin of humans and/or animals.
- UV-C bulbs contain mercury, which is considered hazardous waste and is subject to federal and/or state hazardous waste regulations.
- In rare instances, (similar to standard fluorescent light bulbs) mercury leakage could occur if the bulb breaks and could cause birth or reproductive issues.
- Please keep the UV lamp protective tube clean.
- Inadequate and infrequent maintenance may lower the transmission of ultraviolet light.

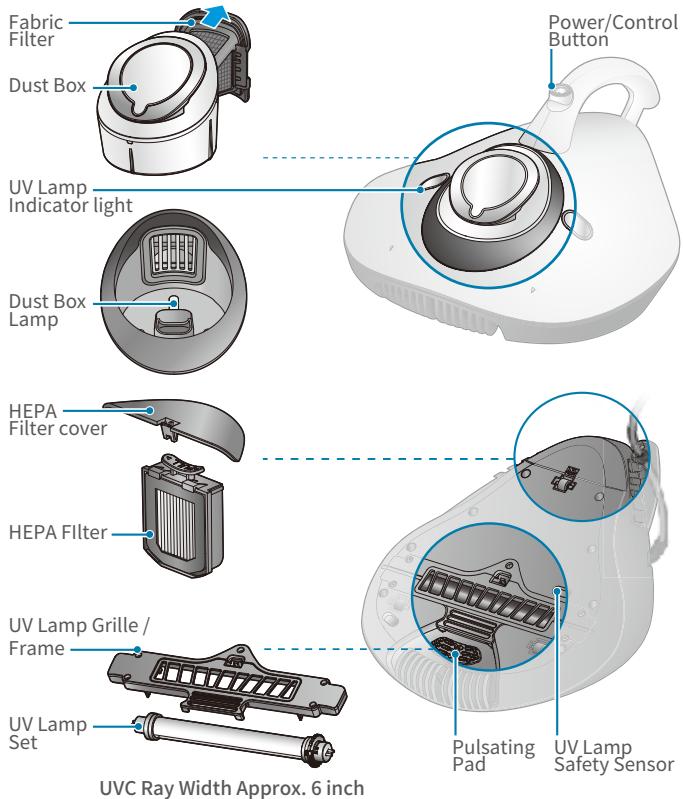

Other Precautions

- Do not use or store heating appliances such as stoves or heaters, nor flammable substances such as combustible sprays near this product.
- Do not vacuum knives, thumbtacks, burning ash, toner powder or other inappropriate materials.
- If you notice any abnormal noise, odors, or smoke emanating from this product, immediately remove the power plug.
- Please visit raycop.com/faq for specific instructions on proper cleaning and maintenance practices.
- This product is intended primarily for household use on mattresses, bed covers, bedding, pillows, cushions, sofas, and other upholstery products.
- Do not use for outdoor purposes or on metal, leather, wood, liquids or other non fabric surfaces.

Use and Maintenance

2

1 Getting to know RAYCOP LITE

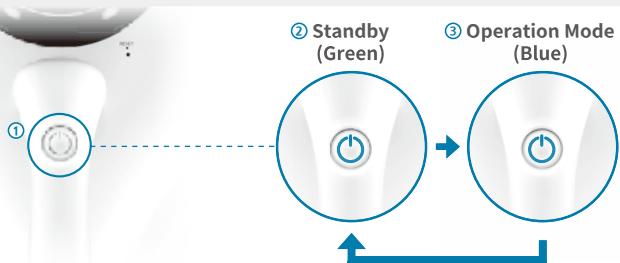

REMINDER:

When it's time to replace your parts, please use genuine RAYCOP parts.

To order please visit www.raycop.com or contact us at support@raycop.com

2 How to Start

① Power Button

② Standby (green light)

Plug the power plug into the outlet and green color indicator appears on the power button.

③ Operation Mode (blue light)

Push the power button and the vacuum will start to operate with the button turning blue.

3 How to Use

RAYCOP allergen vacuums are designed to be sturdy to ensure stability and durability, but you'll quickly see how easily your device glides on the surface. Slowly push and pull along the surface you want to clean 2 or 3 times.

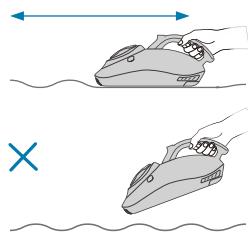

Once your device is laid flat on the surface, the UV light will turn on.

Direct contact on the surface ensures effective cleaning so do not lift or angle your device.

If the device is lifted or angled, the UV light will automatically turn off.

PLEASE NOTE:

The RAYCOP allergen vacuum was designed for home fabric surfaces and is not recommended on wall to wall carpeting, wood, leather or metal.

4 Maintenance

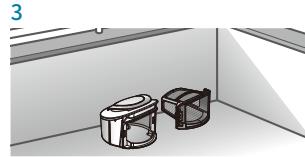

Dust box

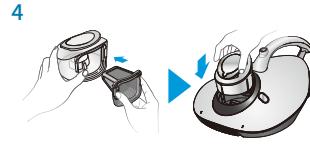

Pull out the dust box as shown below.

To avoid dust from scattering into the air, submerge both the dust box and filter in water and remove the filter from the dust box.

Air dry your filter in a shaded area, do not use a dryer. Once dry, secure the back into the dust box.

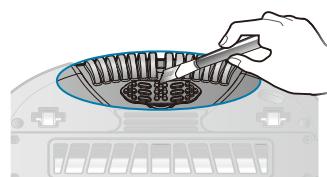

Push back the filter to the end until you hear a "click" sound, and reposition the dust box back in the product.

NOTE:

If the filter is clogged, you may notice that the suction is weaker. Clean the filter with a mixture of water:detergent (ratio 9:1).

Inlet

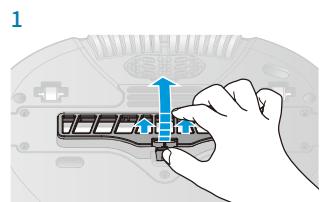

Dust or hair in the inlet may result in reduced performance. Clearly remove foreign materials blocking the inlet using a soft brush or fabric.

CAUTION: A blocked inlet may cause abnormal sounds or overheating, which may result in malfunction or fire.

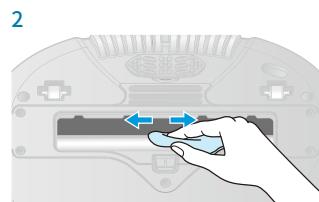

WARNING: Before cleaning, ensure that RAYCOP is unplugged from the power outlet.

UV Lamp

Foreign substances clinging onto the lamp may reduce performance. Please clean the lamp on a regular basis.

Push the hook to remove the UV lamp grille in the direction of the arrow.

Use dry fabric or cleaning towels to clean the surroundings of the UV lamp protective tube.

CAUTION: When cleaning, please make sure the UV lamp protective tube is not broken.

WARNING: Before cleaning, ensure that RAYCOP is unplugged from the power outlet.

* To order replacement parts such as the UV-lamp and HEPA filter, please visit raycop.com/part

COMMITMENT TO QUALITY

Technical Specifications

Serial Number |

Warranty Period | **1 year from the date of purchase** (parts and additional products are not included)

Size (mm) | 11 x 14 x 6in (300 x 352 x 150.5mm)

Weight | Approximately 4lbs (1.95kg)

Power Consumption | 330W

UV-C Lamp | 6W (253.7nm)

Pulsating Pad | 3,300 RPM

Suction Mode | 1 Mode

Air Filtration | Dust Box Filter + HEPA Filter

UV Light Safety Mechanism | Two built-in Sensors for Surface Detection

Motor Safety | Heat Detection with Automatic Cutoff Switch
