

# CAM-MV6

FRONT AND BACK SIX-ANGLE CAMERA WITH PEEK-A-VIEW VISION

Creeping out into traffic is never fun when your view is obstructed with parked cars, buildings and other obstacles blocking your view of what's around the corner.

CAM-MV6 is unique among EchoMaster's many aftermarket cameras in that it's designed for numerous viewing angles. This makes the camera capable of producing an impressively comprehensive view of a driver's surroundings. Capable of mounting on either a lip or a flat surface. Functional as either a front or a rear camera, its unique 180° super wide viewing angle allows the camera, and by extension, the driver, to see around obstructions that could block potential dangers like oncoming cars or pedestrians.

### Key Features:

- ▶ Sensor Type: 1/3" CMOS
- ▶ Min. Illumination (LUX): 0.1
- ▶ Viewing Angle: 180°
- ▶ Water/debris-proof Rating: IP67

### Dimensions (mm/inches)

Your current view without CAM-MV6 when backing out of a parking space.

Eliminate blind spots with CAM-MV6. Your field of vision expands 180° so you can see around what's blocking your view.
