Broan® 27000 Series Downdraft System ECLIPSE®

Ultimate styling complements virtually every cooktop style. Mounts behind most built-in cooktops in island, peninsula and wall mount installations. The unit mounts flush with the cooktop when not in operation, and is activated by light pressure on the cover which automatically raises the chimney 7" above the cooktop. The elevated chimney enables smoke and vapor to be captured at the top of most cooking vessels. A touch on the top of the chimney retracts it to its down position. Washable aluminum filters.

Ventilation Fans

NuTone® Recessed Fan/Lights

Recessed lights are popular lighting solutions. But NuTone took it a step further by incorporating powerful ventilation in the same design. Our new fan/lights disappear into the ceiling with other recessed lights, so they are practical decorating solutions for any room in the house. In the bath they control humidity, and in a utility room, kitchen or high-traffic family room they keep the air fresh and comfortable. 12-3/4" x 8-1/4" x 6-3/4" high housing. 7-3/8" round trim. Damper/duct connector fits 4" duct. Type IC. Fits 2" x 6" ceiling construction.

NuTone® LoProfile™ Ventilation Fan

The new NuTone LoProfile™ fan is our latest solution for installations where conventional ventilation simply won't fit. Where multi-family applications require it, the LoProfile™ fan is narrow enough to be installed in a wall between 2 x 4 studs. When plumbing or electrical obstructions are found behind the drywall in ceiling remodel applications our LoProfile™ fan can still fit without having to move anything. And that means most any room with space constraints can have powerful, quiet and efficient ventilation.

Broan® LoProfile™ Ventilation Fan

The new Broan LoProfile™ fan is our latest solution for installations where conventional ventilation simply won't fit. Where multi-family applications require it, the LoProfile™ fan is narrow enough to be installed in a wall between 2 x 4 studs. When plumbing or electrical obstructions are found behind the drywall in ceiling remodel applications our LoProfile™ fan can still fit without having to move anything. And that means most any room with space constraints can have powerful, quiet and efficient ventilation.

Broan® LoProfile™ Project Packs

The new Broan LoProfile™ fan is our latest solution for installations where conventional ventilation simply won't fit. Where multi-family applications require it, the LoProfile™ fan is narrow enough to be installed in a wall between 2 x 4 studs. When plumbing or electrical obstructions are found behind the drywall in ceiling remodel applications, our LoProfile™ fan can still fit without having to move anything. And that means most any room with space constraints can have powerful, quiet and efficient ventilation. Project Packs offer availability to buy housings for rough-in and motor/blower assemblies and grille later for finishing.

Ventilation Fans — Remote In-Line

It's a pretty simple concept. Mount a high efficiency ventilator in an out-of-the-way location and get the exhaust needed with virtually no sound. Suitable for intermittent or continuous duty. Install the fan in the attic, basement, crawlspace or wherever is convenient. Energy efficient, permanently lubricated motors with high-pressure centrifugal blower wheels accommodate longer duct runs. Designed for quick, easy installation. Removable panels offer easy access to the motor without disturbing ductwork.

Broan SmartSense® Intelligent Ventilation System

The intelligent fan control system creates an integrated residential exhaust ventilation system using Broan's industry leading ventilation control technology and award winning QTXE fans. The Broan SmartSense system uses Broan's Link-Logic™ control technology powered by INSTEON™, a powerful communication technology to monitor everyday manual fan usage throughout the home. Broan SmartSense calculates additional ventilation required by Green Building and ASHRAE Standard 62 related requirements and automatically controls installed fans to achieve proper ventilation. SSQTXE080 and SSQTXE110 fans can provide a single fan solution for small apartments or mix and matched for a customized, integrated ventilation system.

NuTone® ULTRA™ X2 Multi-Speed Series — Sensing

We started with installation and worked back to build the ultimate bath fan. Unique telescoping mounting frame is ideal for both new construction and retrofit. No attic access needed! DC motor for efficiency. Multi-speed capability ideal for meeting ASHRAE 62.2, LEED, ENERGY STAR® for Homes and CA Title 24 — as well as local/spot ventilation needs. Humidity or motion sensing triggers fan to ramp up from lower continuous ventilation level to maximum CFM. Powerful operation maintained over a wide range of real-world installations (CFM rating at 0.1" static pressure maintained through 0.25" static pressure). Fits in 2" x 8" ceiling construction. 10-1/2" L x 11-3/8" W x 7-5/8" H housing. 13" x 14" grille (fan) and 13" x 13-1/4" (fan/light/night light). All models have a 6" duct connector and the 80 CFM models include a 6" to 4" reducer. All ULTRA 80 and 110 CFM fans can also be used with the MD6TU universal make-up air damper if 6" rigid duct is used. ULTRA non-sensing fans (not fan/lights) can also be used with the RDF1 radiation damper. Now with QStream sound technology that features airflow-smoothing baffles to reduce noise caused by turbulence (50 and 80 CFM models only).
