

BOOST↑CHARGE™

Wireless Charging Pad 10W

A Qi™ certified wireless charging pad that provides safe, efficient, and consistent charging. This product is for anyone interested in purchasing a charging pad capable of fast wireless charging iPhone or Samsung devices for the first time. Charge up to nine watts for Samsung, 7.5 watts for iPhone, and standard five watts for all other wireless charging smartphones. Unclutter and simplify charging.

Use Cases

1. Easy alignment allows users to quickly set their phone onto the pad to charge while rushing from meeting to meeting.
2. Users check their phone more frequently when charging at home, but the fast wireless charging speed helps to make up for less time on the pad.
3. People who sleep as little as four hours will wake to find their phone fully charged.
4. If users forget to put their phone onto the charging pad at night, they are able to get a charge while showering and getting ready.
