

Scope of Warranty

Sea Sonic's Warranty covers products against defects in materials or workmanship purchased from an authorized Seasonic retailer from the date of purchase.

General warranty terms may vary between different geographic regions and individual product groups may have different warranty periods and terms. During each product's warranty period, Sea Sonic maintains the discretion to either repair the defective product or replace it with another one of equal or similar performance, provided that:

- The product is returned to the point of purchase, postage prepaid.
- The customer is responsible for paying the costs of shipping when returning their product(s) to Seasonic.
- The product is used according to their intended usage, which is to power PC systems.
 - Using the power supply for mining or powering any other electronic systems that are not personal computers will negate the warranty of the power supply.
 - If the power supply is modified or used in an unusual ambient environment or in any other way that falls outside of the boundary of Intel's current ATX specification – including cooling requirements, connector configuration and pertinent electrical and signal timing specifications, the warranty might be void.
 - Seasonic strongly advises its customers to use the cables that are provided in the packaging box of the power supply. Third-party cables might alter the workings and the safety of the power supply. Please stay tuned for the upcoming special mining cables.
 - For more information of cables and connectors, please visit the [Cable Configuration page](#).
- The product was not damaged due to normal wear and tear or acts of nature, such as lightning, flood or fire.
- The product's cover was never removed and the warranty stickers were not broken.
- The product was not purchased on eBay or similar marketplaces.

The customer is responsible for paying the costs of shipping when returning their product(s) to Seasonic. In certain special situations (e.g., cross-border purchases) customers have to first contact their reseller (shop) or distributor for support.
