USB downstream ports	Connect USB device such as mouse or keyboard on these two downstream ports.
USB upstream port	Connect one end of the USB upstream cable to the USB upstream port on the monitor, and then connect the other end to a USB port on your computer.
Headphone jack	Connect a headset to this jack.

USING THE STAND

You'll need: Soft surface and Phillips screwdriver
1. Place the monitor screen face down on a cushioned, clean surface with the bottom edge hanging over the edge of the surface.
2. Rotate the monitor stand down.
3. Push the stand base onto the stand.
4. Tighten the screw to secure your monitor to the base.
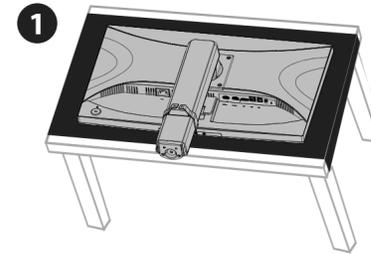

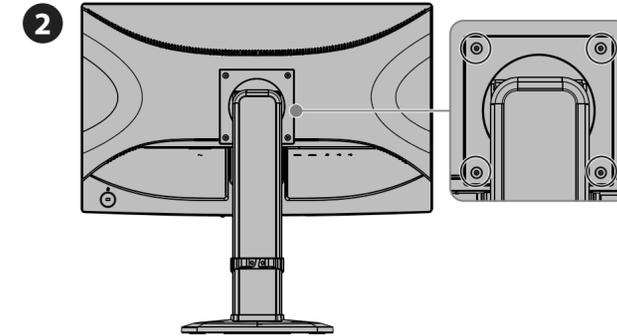

OR

USING A WALL MOUNT

How do I prepare my monitor for wall mounting? (not for use with a monitor stand)
You'll need: Soft surface and Phillips screwdriver

1. Place the monitor screen face down on a cushioned, clean surface.
2. Remove the four screws that secure the stand to the back of your monitor.
3. Attach the wall-mount bracket to your monitor. See the instructions that came with your wall mount for more information about how to correctly mount your monitor. Your monitor takes type M6 wall-mount screws.

Your monitor has four VESA mounting holes on the back. If you attach a wall-mount bracket to the back of your monitor, make sure that you attach it to **all four holes**. If you do not use all four mounting holes, your monitor may fall and cause property damage or personal injury.
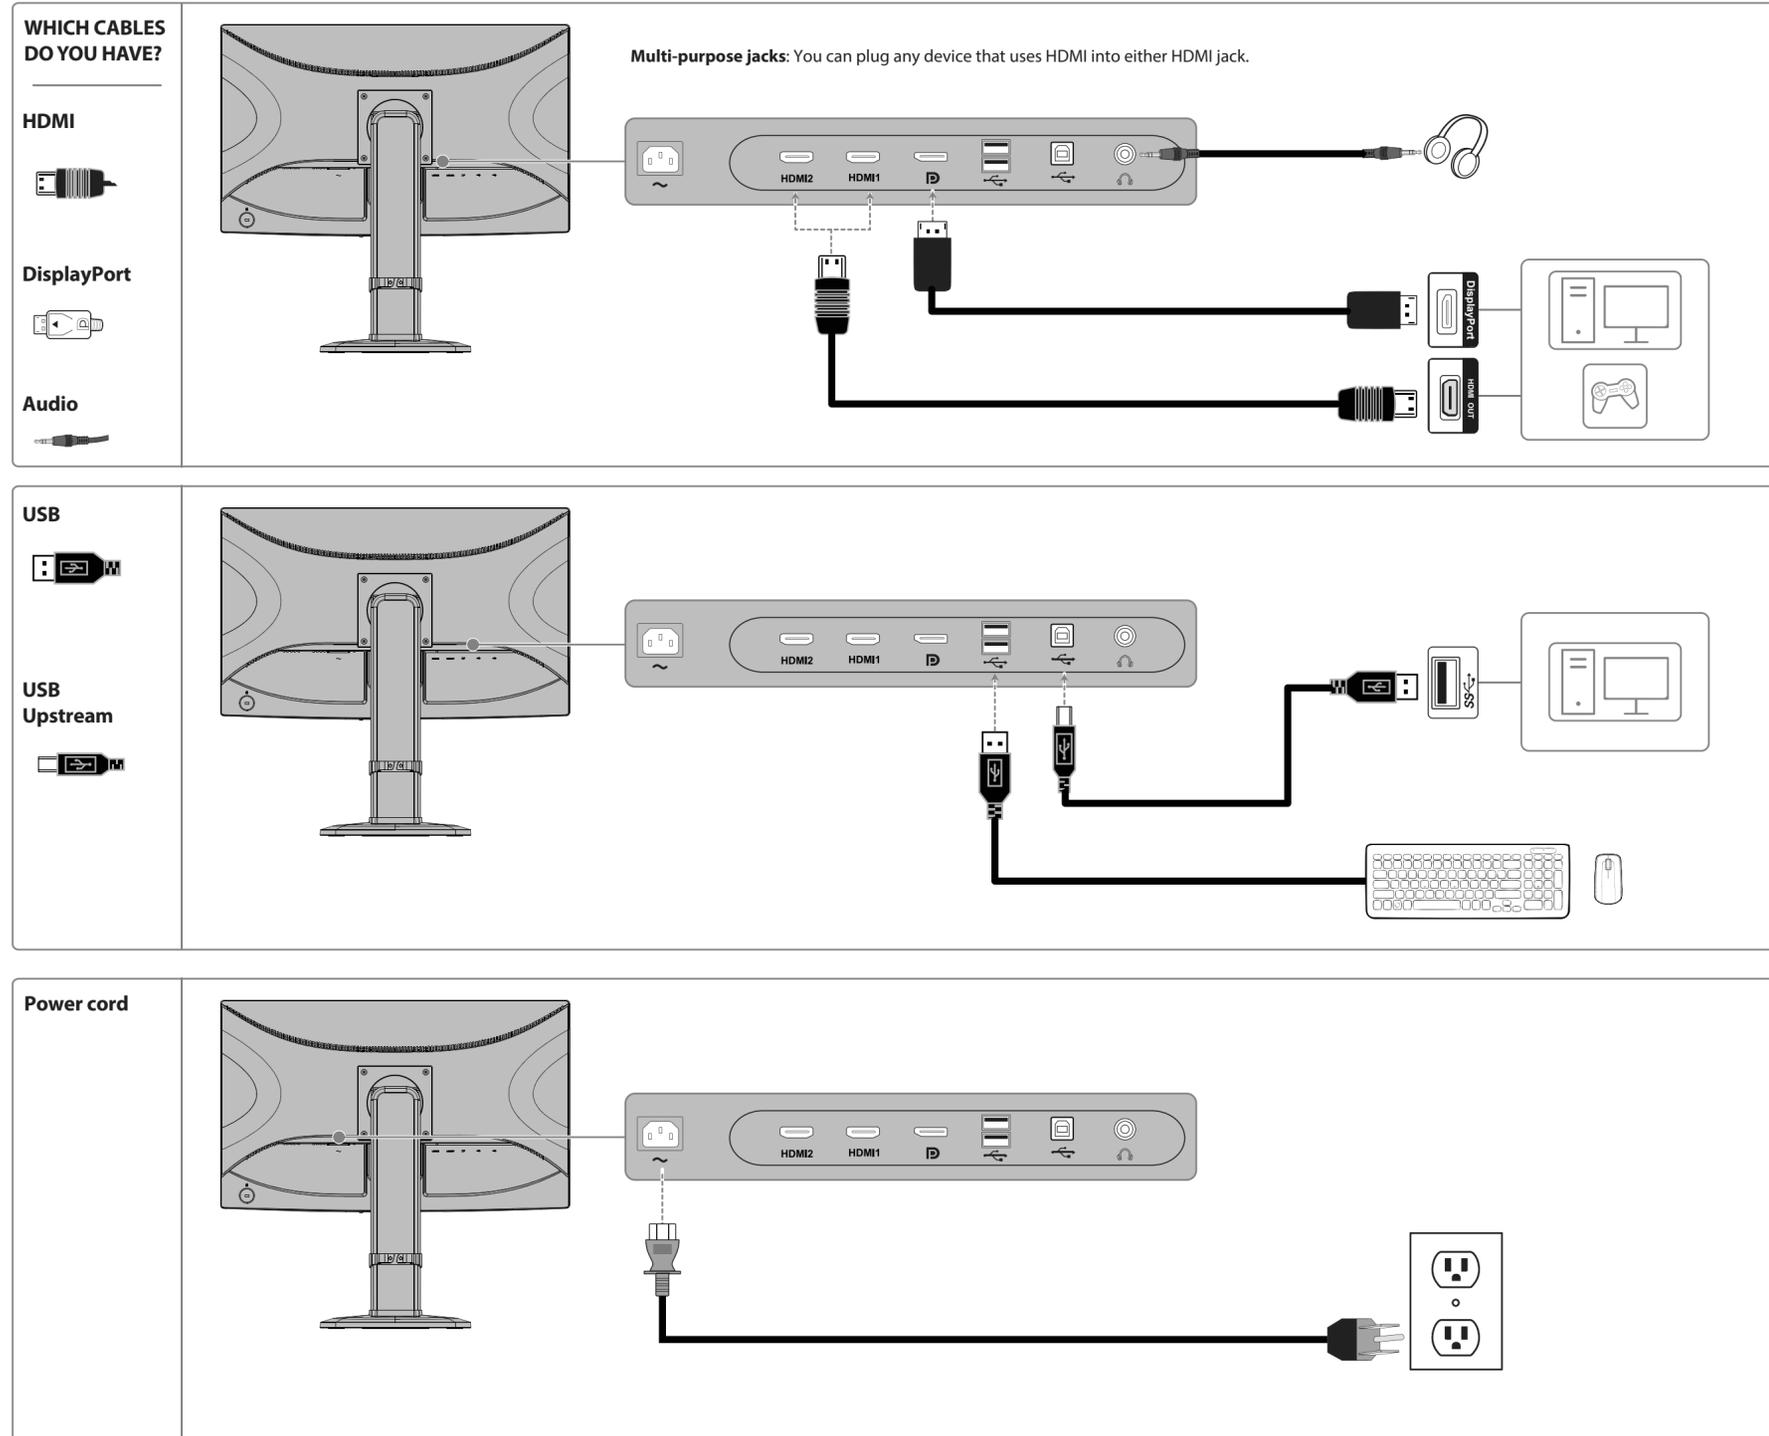

TURNING ON MY MONITOR

Press the power button on the front of your monitor.
