UNIVERSAL REPLACEMENT REARVIEW MIRROR WITH BUILT-IN 360 DEGREE INTERIOR DASHCAM AND TOUCHSCREEN MONITOR

SALES 386-257-2956

PRODUCT OVERVIEW

Record everything going on while driving - both inside and out! Mount the replacement rearview mirror with a built-in 360 degree dash camera onto the windshield to record the driver's view of the front of the vehicle and the interior of the vehicle. This dashcam also has interior audio recording and a photo snapshot capability. Mount the rearview camera on the exterior back of the vehicle for visuals and backup vision. The 4.5" touchscreen monitor provides viewing options and video playback.

Different Recording Modes: The parking mode feature is equipped with a G-sensor that will begin to record with a shock to the vehicle when it is turned off and parked. This built-in collision lock ensures that video is recorded and files are locked in case of an accident to avoid overwriting. Choose from three different power-off options: power off - which shuts down the dashcam, sleep mode - which only records when the G-sensor is activated and Ssly mode - which takes time-lapse photos. Owners can feel safe and secure knowing footage is being recorded when they are inside or outside the vehicle.

- 360 degree frontal camera view (1440x1440/H360 @ 24fps)
(includes driver's view of the front of the vehicle and interior of vehicle)
