KEY FEATURES

Wallpaper Design

Not a gap in sight.

No gap, no shadow. LG OLED's Wallpaper Design is so slim, it looks like it's part of the wall. The radically thin profile is measured in millimeters and only possible with LG OLED TVs.

Pixel Level Dimming

8.3+ million pixels control the light show.

Millions of pixels emit their own light. Only OLED can turn pixels off completely and independently. No LED/LCD TV can do that. See stunning picture, perfect black, infinite contrast and over a billion rich colors. Once you've seen LG OLED TV, you'll understand the difference.
