Toll free: 1-888-595-FLTR (3587)
(Monday - Friday 9:00am - 4:30pm PST)

MODEL#: HLT127

PROPER FIT INSTRUCTIONS:

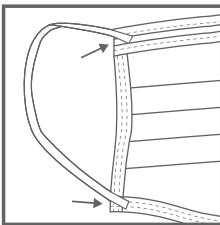

For proper use, follow these steps each time face mask is worn.

1. Locate the front of the mask (elastic straps are attached to the front of the mask). Be sure the front of the mask is facing out during use. (Fig. 1)
2. Elastic straps should be pre-stretched before placing face mask on the face (Fig. 2).
3. Cup the face mask in your hand, with the face mask cupped in your hand, allowing elastic straps to hang freely (Fig. 3).
4. Align face mask under chin with the nose covering area facing up. Pull each strap over your ears, allowing it to rest behind each ear. (Fig. 4).
5. Use both hands to align nose covering area over nose and adjust the nosepiece to fit the shape of your face comfortably (Fig. 5). ALERT! Not properly securing the nosepiece by only using one hand may result in improper fit, decreased filtration, and face mask contamination. Use two hands to secure nosepiece.
6. Make sure the mask is completely secure. Make sure it covers your nose and mouth so that the bottom edge is under your chin. (Fig. 6).

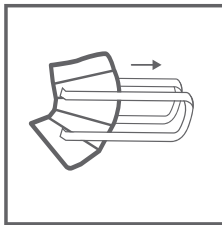

IMPORTANT - RETAIN THESE USER INSTRUCTIONS:
Users must read and understand these User Instructions BEFORE USE. Retain these User Instructions for reference.

DO NOT USE FOR:
This mask is not rated for and should NOT be used with gas, oil-based particles and vapors, aerosol, or asbestos. This mask is intended for general filtration of airborne particles.
