IMPORTANT

- Fan speed detection is only available via the Fan1 header.
- Please always turn off the power supply and unplug the power cord from the power outlet before installing or removing the ARGB LED Strip.
- Please ensure all cables are securely connected before powering on.
- Each port can support a maximum of 64 ARGB LEDs, with a total of no more than 128 LEDs.
- Exceeding these limits may cause ARGB LEDs to display abnormal colors, flicker, or be unable to change colors.

LED Switch Button Function

- Single press: Toggle LED effects.
- Long press (2s): Sync with the motherboard; press again (2s) to switch back to the controller.
- Long press (6s): LEDs flash white three times, then turn off (remains off after reboot). Press again to restore the previous state.
