STEP 4

(B)	 M8x35mm	8PCS
(D)		1PC

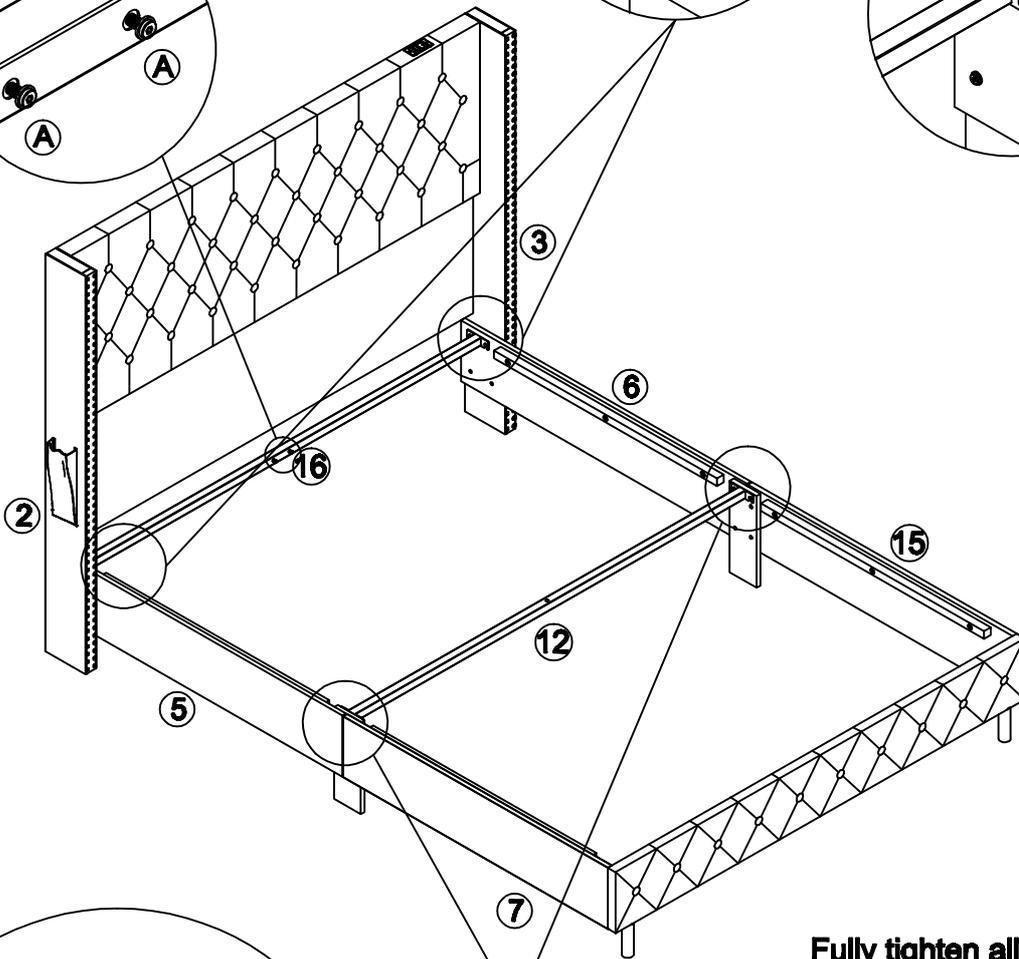

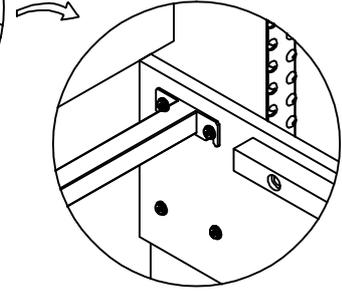

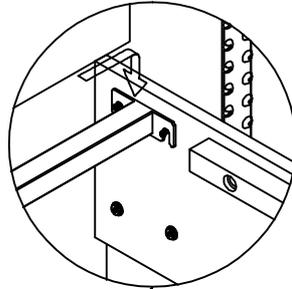

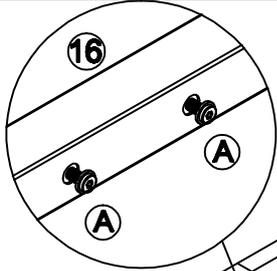

Fully tighten all the Bolts.

STEP 5

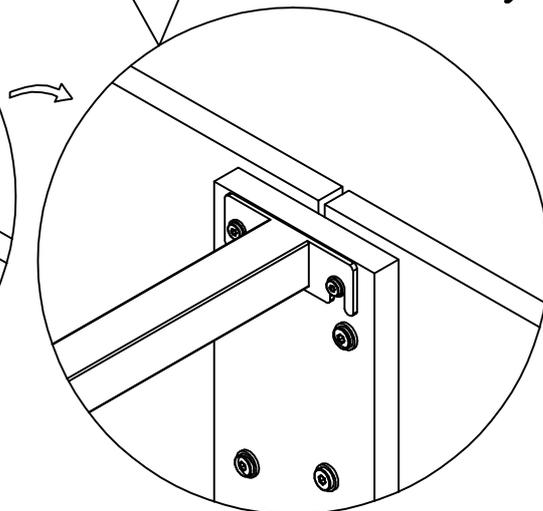

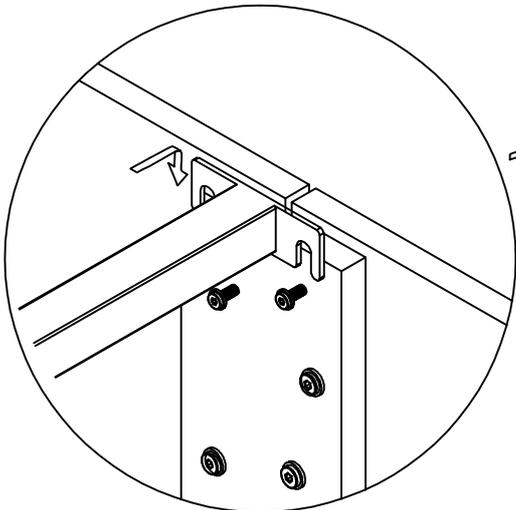

(A)	 M8x18mm	2PCS
(D)		1PC

(A) Please tighten to 70% first

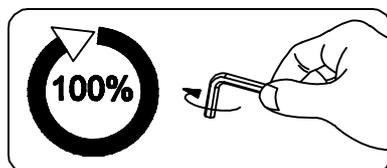

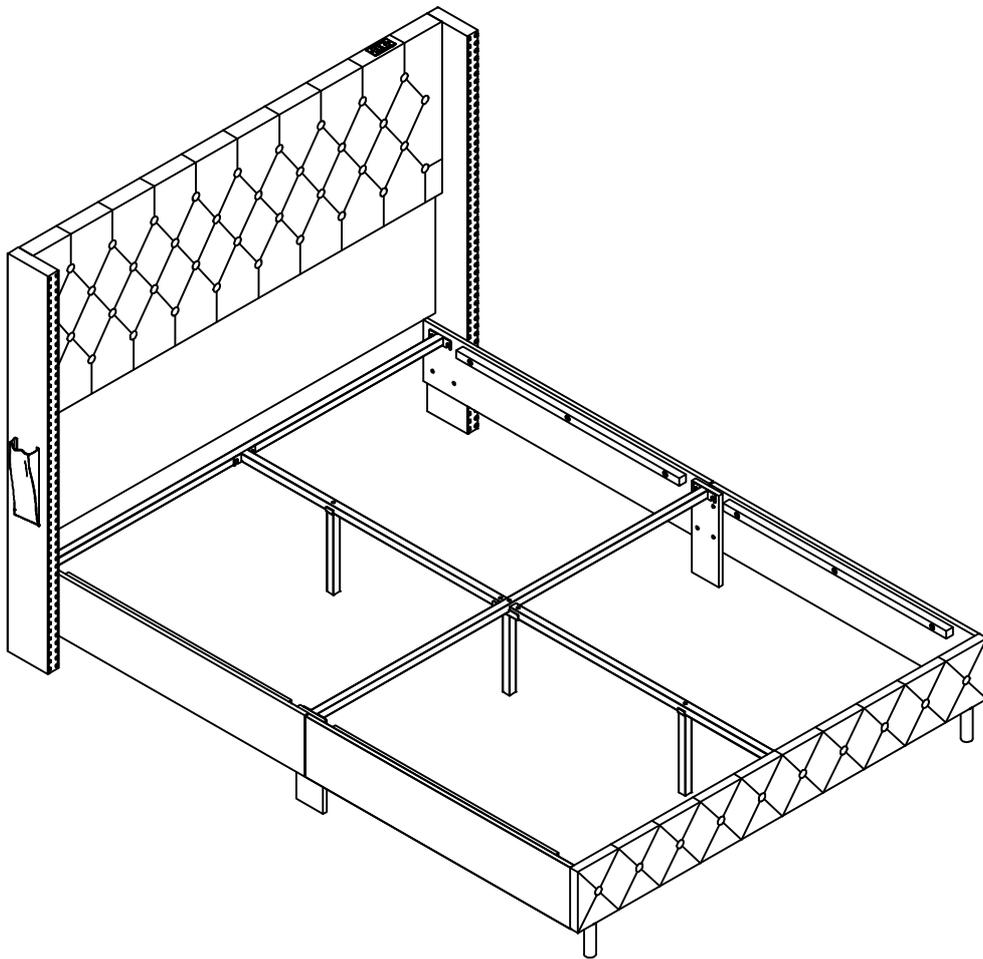

Fully tighten all the Bolts.

Fully tighten all the Bolts.

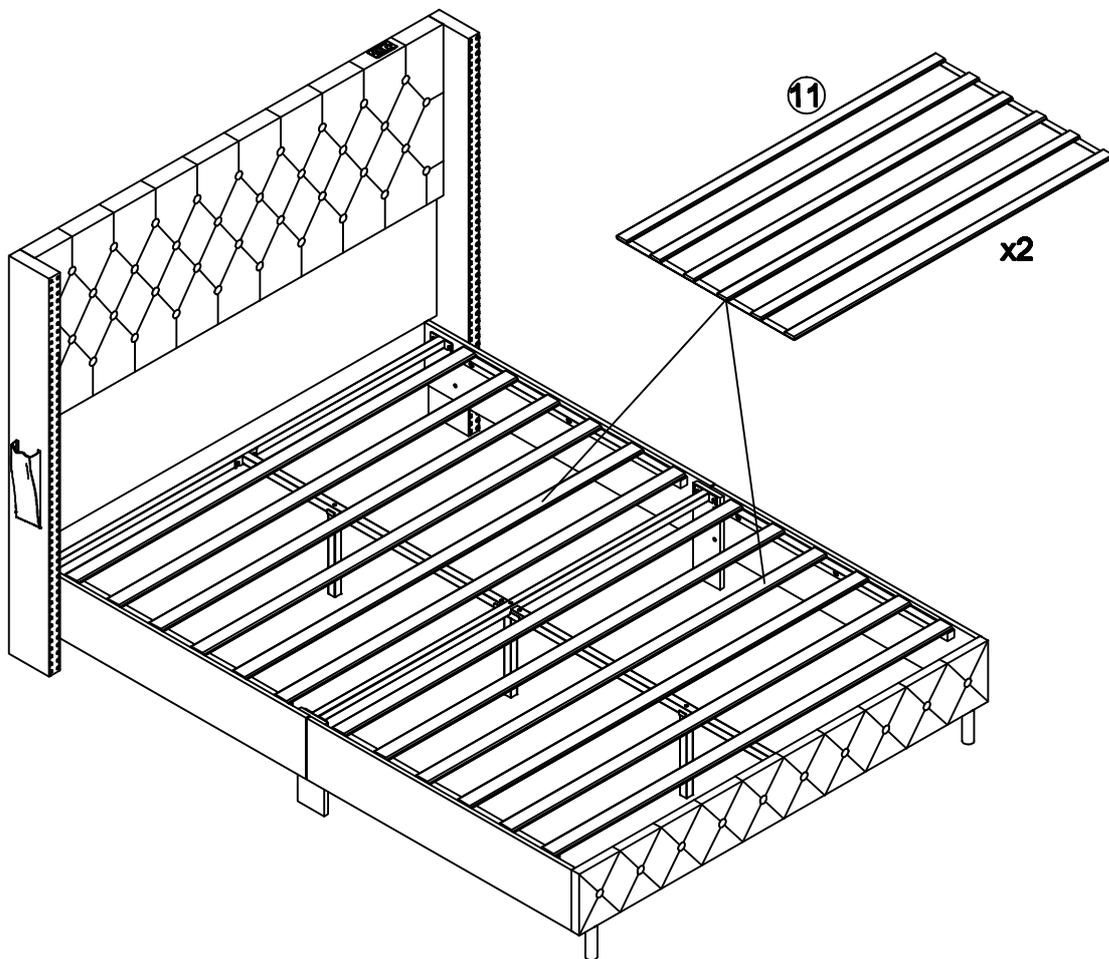

STEP 7

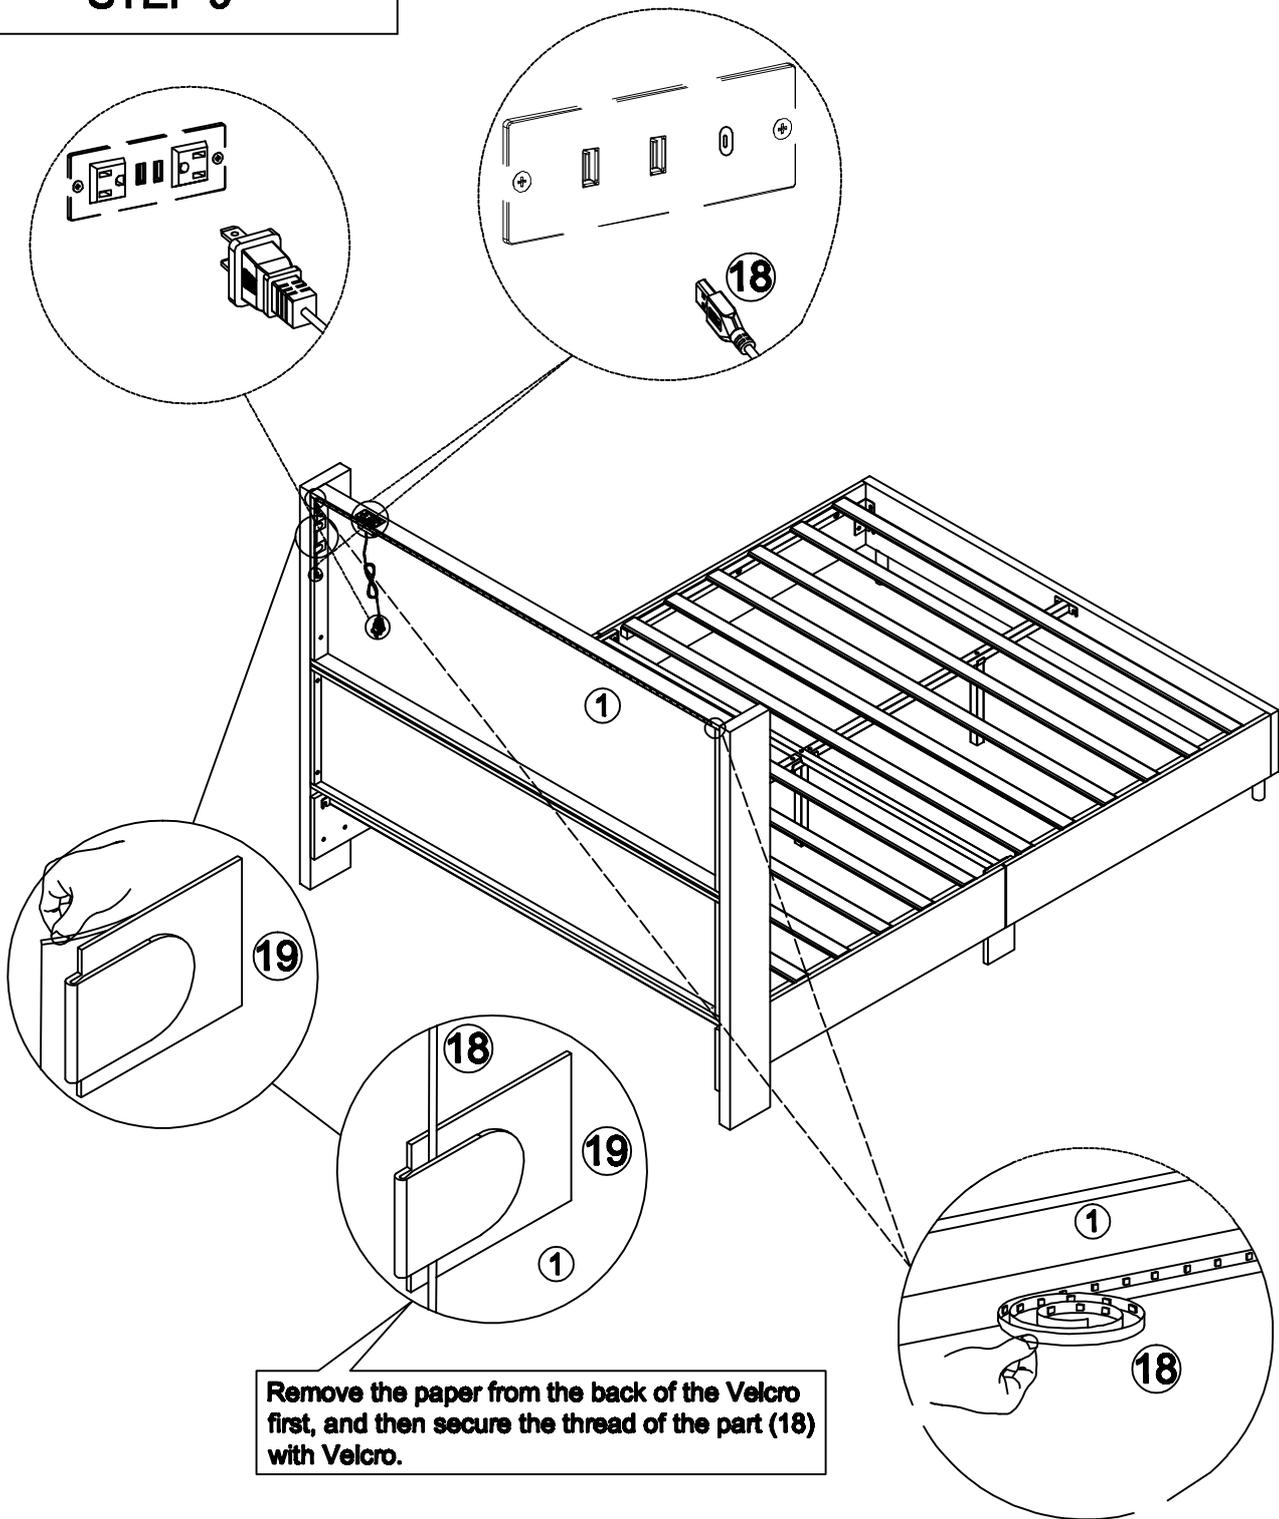

**Please complete the installation of pat 6
first and then tighten the screws to 100%.**

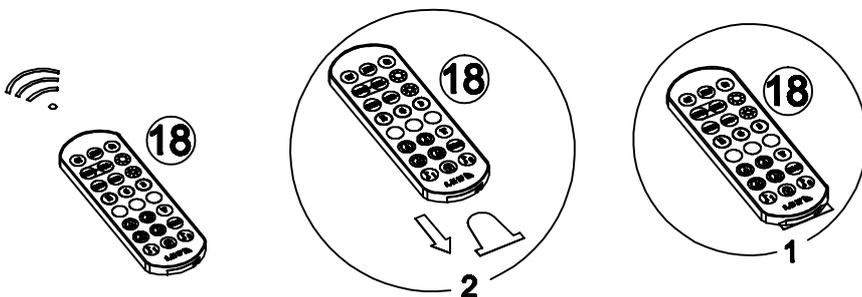

STEP 8

STEP 9

Remove the paper from the back of the Velcro first, and then secure the thread of the part (18) with Velcro.

LotusLantern APP Manual

1. Software Overview

1.1 Overview

LotusLantern is a mobile APP to control LED strip by both IOS and Android phones.

The traditional control ways like infrared, 433MHz, 2.4GHz and others old wired ways will be replaced by mobile phone control way with convenient, powerful and scalable features.

Through this mobile APP , you can not only control the color, brightness and color temperature of the LED strips but also set up all kinds of fancy flash mode ; Also this APP can change the light of the LED strip according to the rhythm of the music. This APP can set and control several LED strips through Bluetooth and the operation is very simple, easy to learn and easy to use.

1.2 Features

- Adjust color LED strips with 60,000 colors to change color and brightness and adjust monochrome LED strips to change brightness and color temperature
- Play music or turn on a sound playback device, you can let the light change the color and brightness with the rhythm of music, the music rhythm beautiful
- Inside multiple setting mode for color change and control LED strips without mobile
- Long distance control with omni-directional antenna, and many-to-many group control mode
- Once the connection is successful, connect automatically next time

1.3 Performance

LotusLantern APP is easy for use as well as great compatible with all kinds of smart phones; After the actual test of hundreds of mobile phones verification, the compatibility is above 95% of mobile phones in the market. APP is small and convenient, it consumes less system resources, so the requirements of the mobile configuration are low. Control delay is small, the operation feels good, light control is smooth with people's visual sense.

2. Operating Environment

This APP program requires phones of system above Andriod 4.3 and iOS 8.0. Mobile phone configuration is not limited.

3. Instructions

Note: Android version and iOS version download and use the same method, here in the Android version as an example.

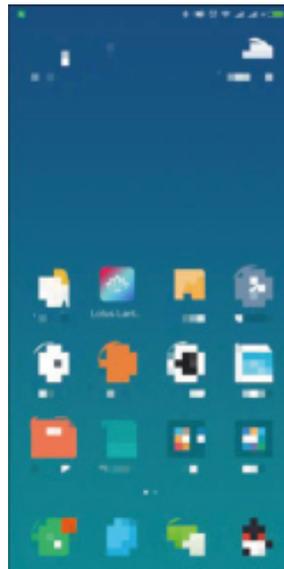

3.1 APP Download

Scan the QR code

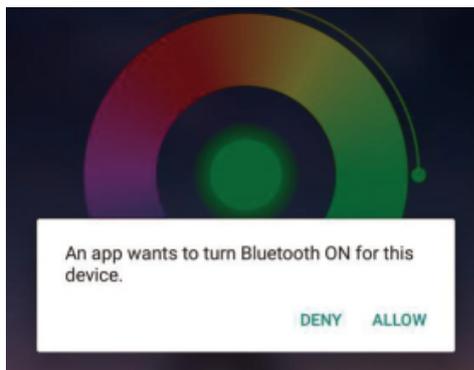

iOS and Android systems can download the "LotusLantern" APP by scanning the QR code. Open the browser or other tools with "Scan QR code" function, scan the "LotusLantern" QR code as below:

3.2 App Operation

- (2) After entering the APP interface, if Bluetooth is not enabled, "an application wants to enable the Bluetooth function of this device." Click [Allow]

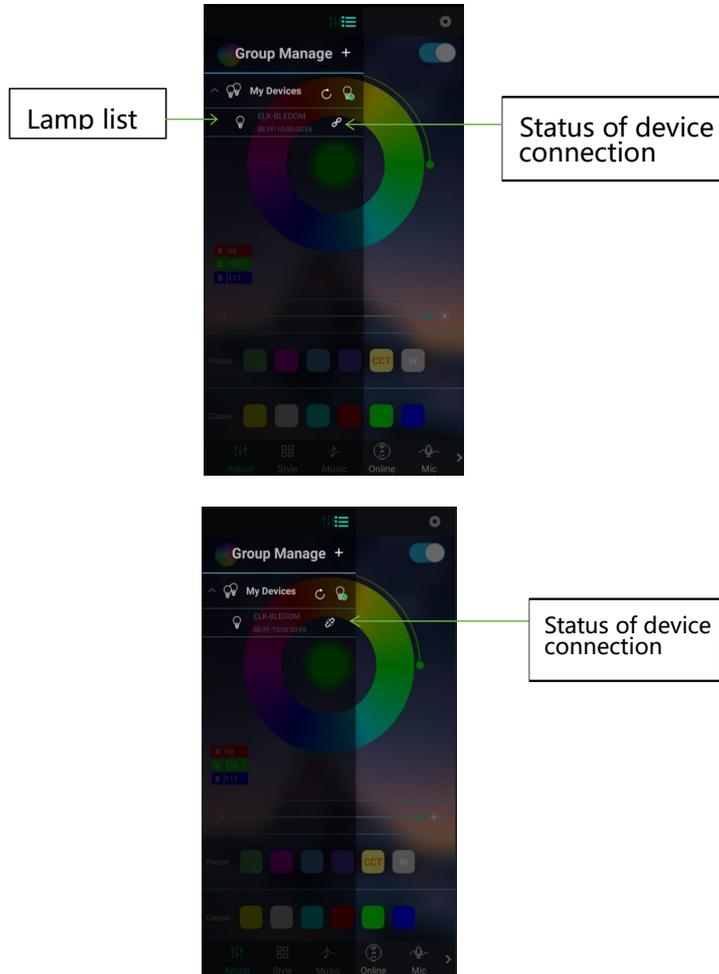

- (3) switch to color and brightness interface:

A smartphone app interface for adjusting color and brightness. The screen features a large color wheel in the center, a brightness slider at the bottom, and various control buttons. Callout boxes with arrows point to specific features:

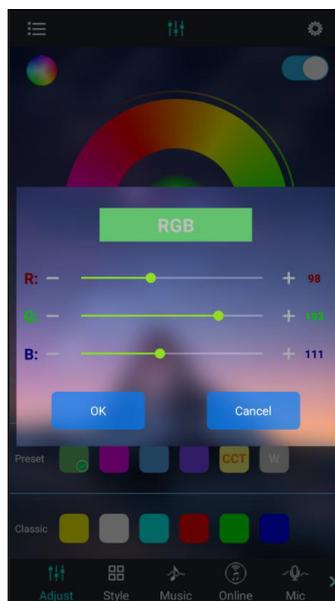

- Click to show the lamp list (points to the top-left menu icon)
- Switch the color wheel (points to the top-left color wheel icon)
- Display the RGB value (points to the RGB value display area)
- Click to manual adjustment view (points to the manual adjustment view icon)
- Click to shift the interface (points to the bottom-left home icon)
- Click to display setting view (points to the top-right gear icon)
- Lamp switch button (points to the top-right toggle switch)
- Adjust the color (points to the color wheel)
- Click square icon to adjust the color (points to a square icon in the bottom-right area)

(4) click to show the lamp list, view lamp list:

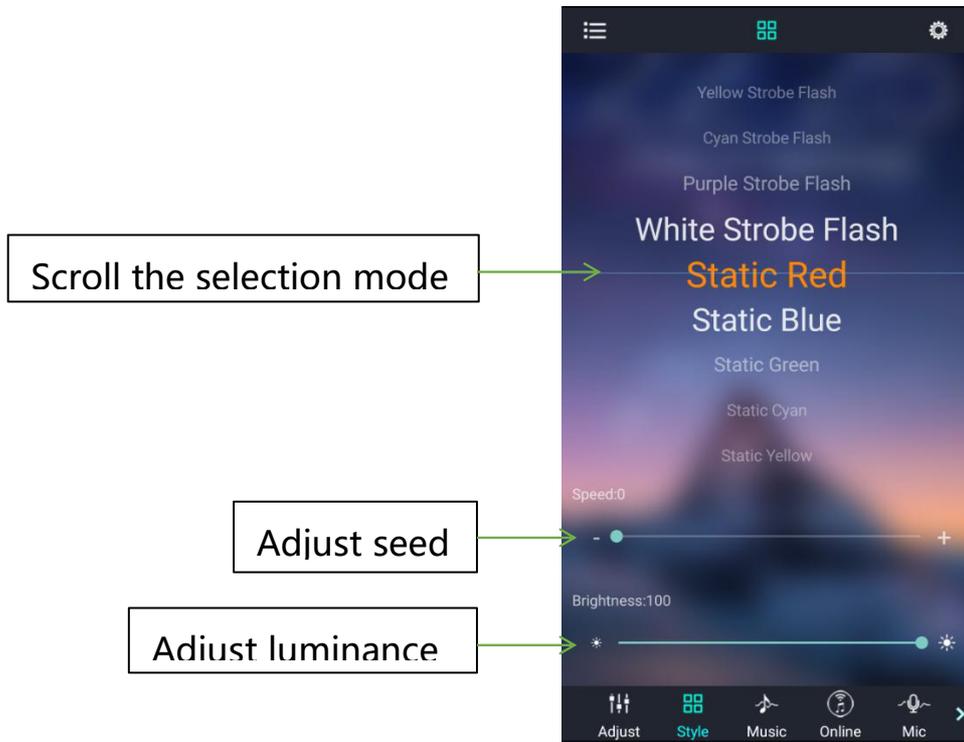

Bluetooth auto connect
after search for devices

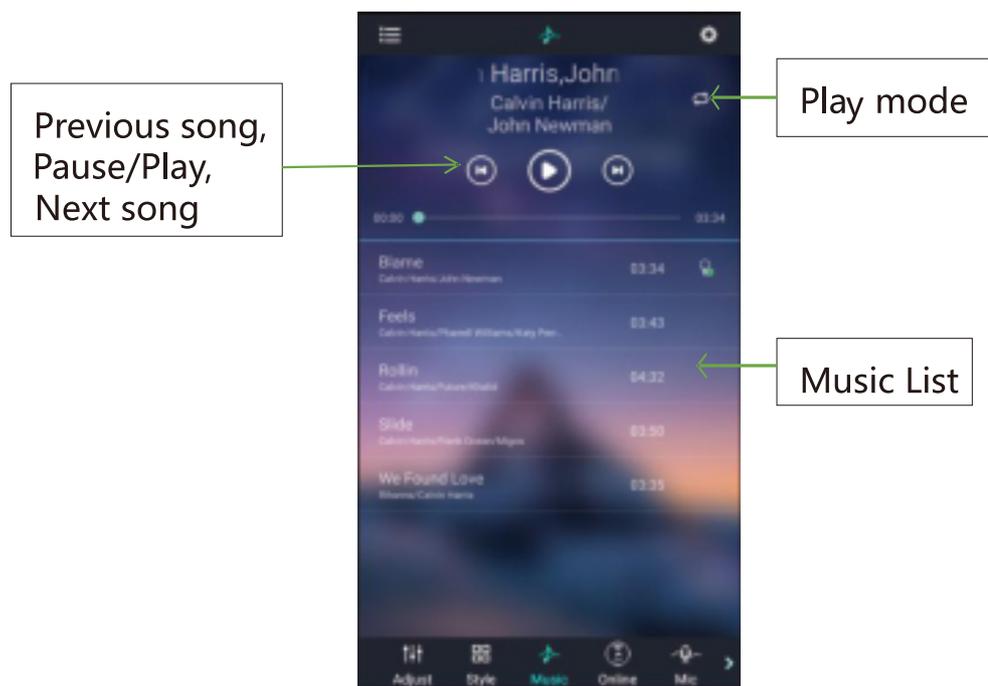

(5) Click to RGB manual adjustment view:

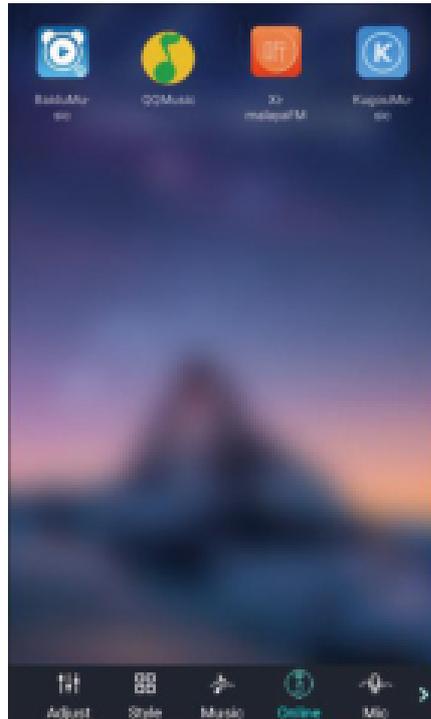

(6) switch to the mode interface:

(7) switch to the music rhythm interface:

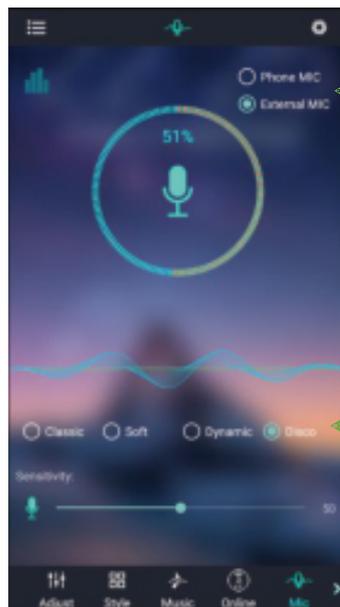

(8) Switch to the online music interface:

(9) Switch to the microphone rhythm interface:

Music rhythm through the microphone on the product

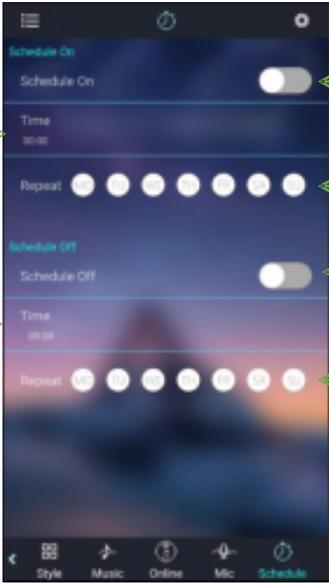

Switch phone microphone and external microphone

4-style rhythm

Change the sensitivity of MIC to match the sound

(10) Switch to the schedule interface:

The screenshot shows a mobile application interface for scheduling. It is divided into two main sections: 'Schedule On' (top) and 'Schedule Off' (bottom). Each section has a toggle switch, a 'Time' field, and a 'Repeat' row of seven circular indicators. The 'Repeat' indicators for 'Schedule On' have the first two selected (white), while the others are grey. The 'Repeat' indicators for 'Schedule Off' have the last two selected (white), while the others are grey. Callout boxes point to these elements with green arrows.

Set the time of Light-On

Set the time of Light-Off

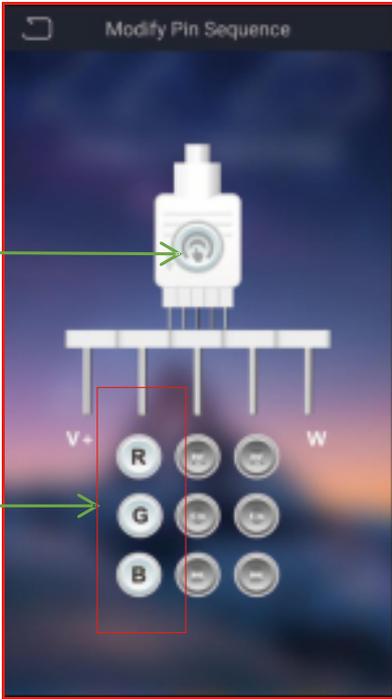

Enable or disable the Light-On function

Repeat setting
No selection for once Light-On

Enable or disable the Light-Off function

Repeat setting
No selection for once Light-Off

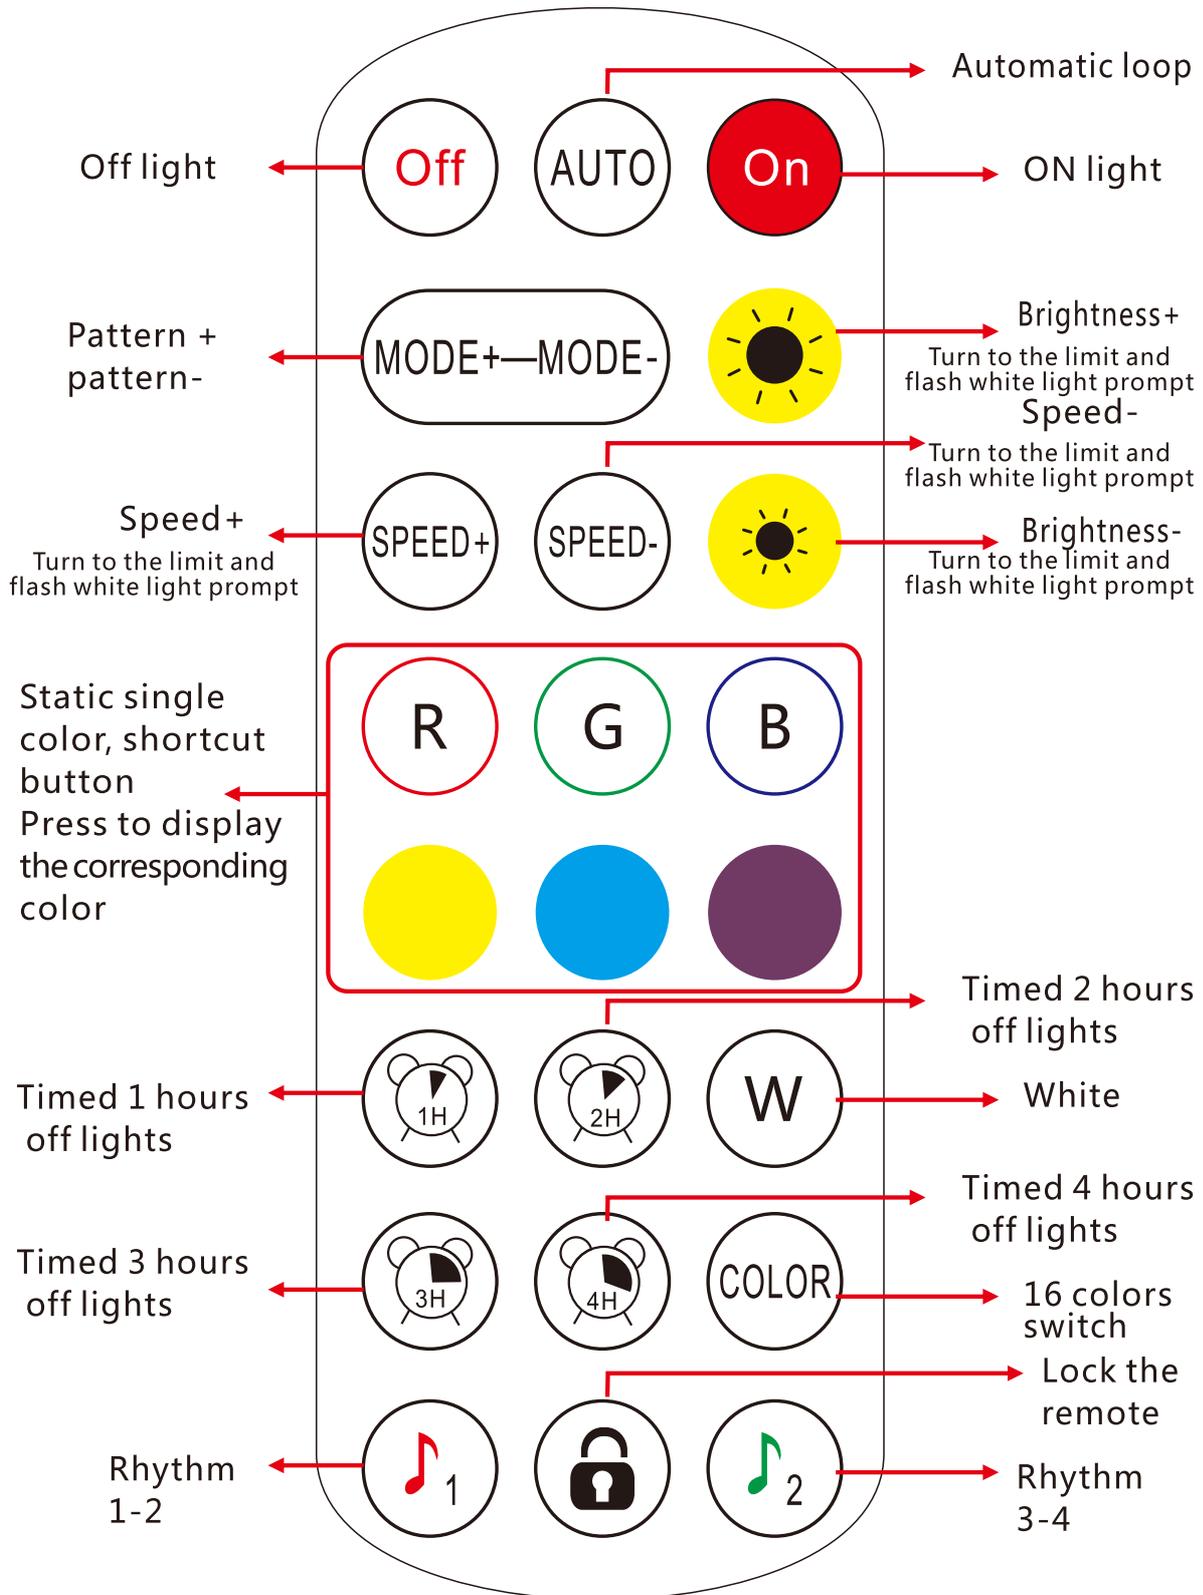

(11) Switch to the modify pin sequence interface:

The screenshot shows a 'Modify Pin Sequence' interface. At the top, there is a 'Modify Pin Sequence' title and a back arrow. Below the title is a white connector block with five pins. Underneath the pins are five vertical lines representing the pin sequence. Below these lines is a keypad with three rows of buttons. The first row has 'V+', 'R', and 'W'. The second row has 'G', a button with a right arrow, and a button with a left arrow. The third row has 'B', a button with a right arrow, and a button with a left arrow. A red box highlights the 'R', 'G', and 'B' buttons. Callout boxes point to a save button and the keypad with green arrows.

Click to save the new assignment

Change the real color of this line

Rhythm 1-2: Single click to switch to 1-2 rhythm mode
 Rhythm 3-4: Click to cycle through the 3-4 rhythm mode
