PACKAGE CONTENTS

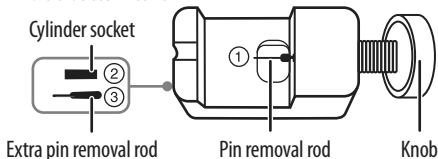

- Stainless Steel Link Band
- Adjustment tool
- Pin removal rods
- Quick Setup Guide

Before using your new product, please read these instructions to prevent any damage.

OVERVIEW

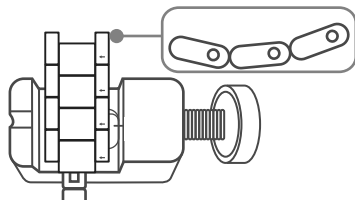

Adjustment Tool

Inside bottom cover

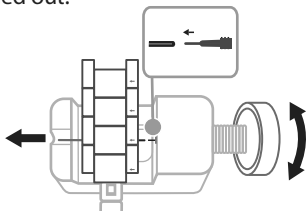

ADJUSTING THE LENGTH OF YOUR BAND

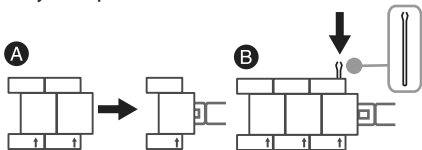

- 1 To remove links, widen the adjustment tool to make room for your band by turning the knob counterclockwise.
- 2 With your band's arrows facing up and pointing away from the knob, place the band in the adjustment tool's slot, then align the pin-removal rod with a pin in the band.

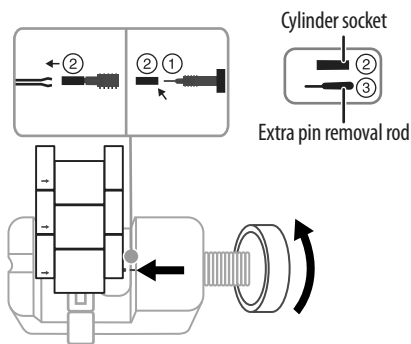

- 3 Turn the knob clockwise until the pin is partially pushed out.

- 4 Turn the knob counterclockwise to remove the band, then pull the loosened pin out.
- 5 Repeat steps 2–4 until your band is the desired length. Store the unused pins and links for future use.
- 6 To reattach the band pieces, push the links together with their arrows facing up, then slide the pin partially into place.

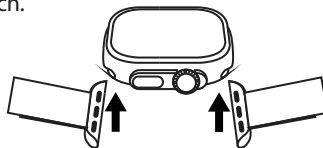

- 7 Put the cylinder socket (2) on the pin removal rod (1). Place the band in the adjustment tool with the arrows facing up and pointing toward the knob. Then align the pin with the cylinder socket (2) and turn the knob clockwise to push the pin into place.

ATTACHING YOUR BAND TO YOUR APPLE WATCH®

- 1 Remove the existing band from your Apple Watch.
- 2 With the Apple Watch screen and straps' black dots facing up, slide the straps into the Apple Watch.

REPLACING THE PIN-REMOVAL ROD

If the pin removal rod becomes damaged, you can replace it with the spare, stored in the base of the adjustment tool.

- 1 Open the bottom cover of the adjustment tool to find the cylinder socket (2) and extra pin removal rod (3).
- 2 Use pliers to pull out the pin removal rod (1) and replace it with the extra pin removal rod (3).
