How do I watch TV (cable or satellite receiver) and/or connect a device such as a DVD or Blu-Ray Disc player, game station, or camcorder?

Using an HDMI cable (BEST)

Multi-purpose ports: You can plug any device that uses HDMI into either HDMI jack. However, an ARC or DVI device must be connected to the **HDMI 1/ARC/DVI** jack. See the instructions that came with your ARC or DVI device for more information.

Note: The HDMI 1/ARC/DVI jack is a shared jack. This means you can connect either an ARC device or a DVI device.

Using component cables (BETTER)

- OR -
Using an AV cable (GOOD)

Note: The component and AV jacks are shared. This means you can connect only one component or AV device at a time. We suggest using HDMI if your device supports it.

Note: Connect the yellow video cable connector to the green **Y/VIDEO** jack on the back of your TV.
