5 Limited Warranty - Terms & Conditions

Swann Communications warrants this product against defects in workmanship and material for a period of one (1) year from its original purchase date. You must present your receipt as proof of purchase for warranty validation. Any unit which proves defective during the stated period will be repaired without charge for parts or labour or replaced at the sole discretion of Swann. The end user is responsible for all freight charges incurred to send the product to Swann's repair centres. The end user is responsible for all shipping costs incurred when shipping from and to any country other than the country of origin.

The warranty does not cover any incidental, accidental or consequential damages arising from the use of or the inability to use this product. Any costs associated with the fitting or removal of this product by a tradesman or other person or any other costs associated with its use are the responsibility of the end user. This warranty applies to the original purchaser of the product only and is not transferable to any third party. Unauthorized end user or third party modifications to any component will render all warranties void. By law some countries do not allow limitations on certain exclusions in this warranty. Where applicable by local laws, regulations and legal rights will take precedence.

For Australia: Our goods come with guarantees which cannot be excluded under Australian Consumer Law. You are entitled to a replacement or refund for a major failure and for compensation for any other reasonably foreseeable loss or damage. You are also entitled to have the goods repaired or replaced if the goods fail to be of acceptable quality.

6 FCC Verification

This equipment has been tested and found to comply with the limits for Class A digital device pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

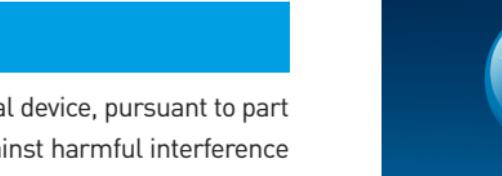

- Reorient or relocate the receiving antenna
- Increase the separation between the equipment and the receiver
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected
- Consult the dealer or an experienced radio/TV technician for help

These devices comply with part 15 of the FCC Rules. Operation is subject to the following two conditions:

- (1) These devices may not cause harmful interference.
- (2) These devices must accept any interference received, including interference that may cause undesired operation.

INSTRUCTION MANUAL

Extra Security Camera

Add-on Dome Camera for 1080P DVR Systems

Introduction

Congratulations on the purchase of your Swann Extra Security Camera. **Important:** **1.** Make sure

- Enjoy day & night protection with the latest thermal-sensing security & have a crystal clear bird's eye view of your premises
- See what's happening in any light with infrared cut filter & powerful LEDs
- State-of-the-art True Detect™ PIR motion sensor is designed for security applications with the ability to reliably detect people, cars, large pets & other heat-generating large objects
- With discreet dome styling & sturdy aluminium construction, the camera suits indoor & outdoor applications with an IP66 rating for any weather conditions & cable threaded through the mounting bracket for added protection

1. Make sure the camera is fixed correctly and stable if fastened in place.

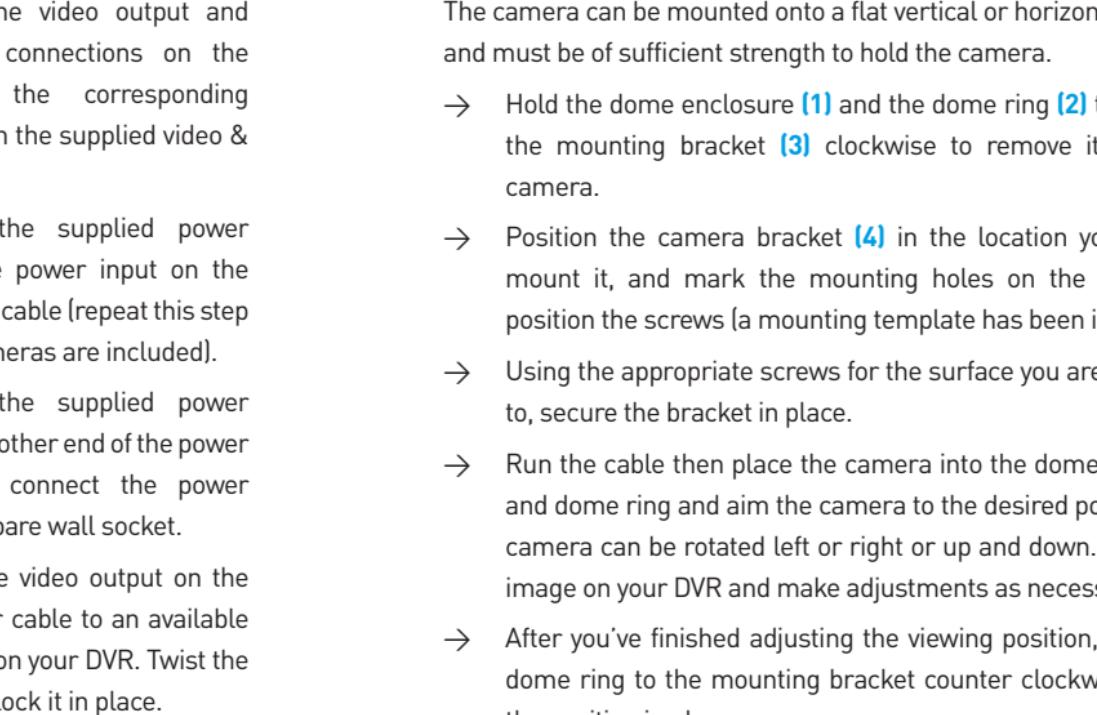

2. Only use the supplied power adapter (12V) and power splitter (if supplied).

3. Do not operate if wires and terminals are exposed.

Please note: Have a look at the camera location tips included with your DVR, to select the best location for your camera (the camera location tips provided here are for general purpose only).

Important note: All jurisdictions have specific laws and regulations relating to the use of cameras. Before using any camera for any purpose, it is the buyer's responsibility to be aware of all applicable laws and regulations that prohibit or limit the use of cameras.

3 Mounting the Camera

1

The diagram consists of two parts. The top part is a line drawing of a camera lens with three concentric circular elements. Three blue circles with numbers 1, 2, and 3 are pointing to the top, middle, and bottom edges of the lens respectively. The bottom part is a line drawing of a circular mounting plate with a central circular cutout and four circular mounting holes. A blue circle with the number 4 is pointing to the bottom edge of the plate.

1. Take into consideration what you want and where you'll get the best view of it.

2. How you're going to connect the camera monitoring system; remember that camera connections should be kept out of the weather.

3. How to keep the camera out of harm's way; it is recommended to mount your camera at a safe position.

4. Place your camera as close to the area as practicable. The best position is from 13ft/4m above looking slightly down, keeping the details you are looking for.

5. Although the sky looks nice when you look at the live view from your camera, it is an unlikely place for an offender to approach. Make sure your camera has minimal sky in it as the light in daylight makes the foreground of the image darker.
