

# Polaroid PD-G55H Dash Cam

Driving safely is living safely. As there are more vehicles added on the road, driving becomes more dangerous and unsafe for all motorists. Drive safely with security and peace of mind with PD-G55H. The PD-G55H, with its compact size and attractive design provides high definition 1080P video quality, 156 degree wide angle lens, audio recording capability, Lithium Polymer Rechargeable Battery, allowing up to 32 GB Micro SD Memory Card for continuous recording and ease of use. Whether you need that reliable eye witness in your vehicle to capture that unforeseen and unexpected accident, a reckless driver or capturing an interesting and attractive sighting, PD-G55H will be your reliable Camcorder to record the scene.

## Features and Specifications

### High Definition, Full-HD 1080P video recording

Capture clear and crisp recording with high definition Full-HD video quality. PD-G55H is compatible with micro-SDHC memory card up to 32GB with a requirement of class 6 or greater.

### Ease of use and installation

The PD-G55H is extremely easy to use with a very simple installation process. The on/off bracket makes for a quick install. The PD-G55H automatically turns on when the power socket is tied to the ignition switch when the vehicle starts. Conversely, when the vehicle is shut off, the unit stops recording and automatically powers off.

### Compact size with a large LED display

Enjoy vivid and clear high-def video quality on the 2.5" color LED display. The ultra wide angle 156 degree allows for a wide coverage to capture the critical elements. The PD-G55H with its compact size is perfect to carry and mount any location of the vehicle.

### Automatic collision detection and Parking Guard

PD-G55H's emergency recording gets automatically triggered by G-sensor and the video recordings are dated and time stamped. The Parking Guard mode is also triggered by G-sensor to protect your car from hit-and-run incidents when the ignition is off.

### GPS tracker and software

GPS tracker records your location and speed, providing accurate data when an event occurs, while GPS software provides easy playback with GPS information (latitude, longitude, date, time, speed, and vehicle direction).

### Continuous/Loop recording

Loop recording is a technology that allows for continuous video recording by replacing the old recorded video with the new file. This technology provides the user to select the desired length of video clips (3, 5, or 10 mins) to the installed micro SDHC card.

# | PD-G55H

Specifications	
Display Dimensions	2.5 inch LED Color Panel (TFT)
Sensor Type	CMOS Sensor
Lens	156 Degree View Angle
Focus Range	0.3m~Infinity
Video Resolutions	Full HD: 1920 x 1080 HD: 1280 x 720
Video Format	H.264
Still Image Resolution	3 M
Still Image Format	DCF (JPEG, Exif: 2.2)
ISO Sensitivity	Auto
GPS Tracker (with PC software)	Records & playback: vehicle location, direction, speed, latitude, longitude, date, time
G-Sensor	3-Axis G-force sensor
Parking Guard	When turned on, G-Sensor triggers recording even when cam power is off
Loop Recording	Continuous video clip loop recording of 3, 5, or 10 minute lengths (user selected)
Microphone	Built-in
On Screen Languages	English, Spanish, French
Storage Media	MicroSD / SDHC (Up to 32 GB) Note: Class 6 or above is recommended for HD video recording
Connectivity	Micro USB
Power	Battery: Rechargeable Li-Polymer Battery (battery is sealed within the Dash Cam and not customer replaceable)
Dimensions	2.48 x 2.76 x 1.15 inch (63 x 70 x 29.1 mm)
Weight	0.21 lb (94 g)
What's in the box	Car Adapter (with USB connector) Windshield Mounting Bracket User Manual (warranty info included) Quick Start Guide Software CD
Operating Temperature	14° F ~ 158° F
Warranty	Manufacturer defect warranty from date of purchase (may vary by region)
