

## Datasheet

### eBlocker Family (1 Year Updates)

**eBlocker Family (1 Year Updates)** is a smart device that is connected to your home network. It anonymizes your online behavior and ensures that only information is passed on – that you really want to. No software installation or configuration is needed: it blocks ads, stops trackers and hides your IP address on all devices and all browsers. That differentiates eBlocker from conventional browser plugins against trackers and online-advertising. The product itself does not gather any data after connection. Simply connect it to your home network, turn it on and your privacy is protected instantly.

**eBlocker Family (1 Year Updates)** is based on eBlocker and adds user **individual White- and Blacklists** and **Parental Control**.

- Incl. 1 year daily updates for free
