

ThinkCentre M70s Gen 3

Powerful and versatile, this small form factor desktop is designed to boost everyday productivity while saving time, effort, and desk space. It comes with up to four DDR4 (3200MHz) and up to 128GB memory support with Intel Iris X graphics, enabling seamless multitasking and work on complex data operations and graphic projects. Connect up to four displays for maximum productivity. Plus, its onboard and optional security solutions ensure optimum device and data security.

Rugged compact performance primed for business

Whether you run a small business or a department of an enterprise, these desktops are built to handle every workload. Easy to manage, they offer great expandability, rapid processing, and seamless switching between multiple programs.

Security features include an optional eLock, which locks the computer from the inside, preventing unauthorized removal of components and an optional smart cable clip for preventing removal of wired peripherals. Plus, onboard TPM 2.0 encrypts data end-to-end, while Kensington slot locks the device to the desk.

Despite its smaller size, this desktop has 9x USB ports, including a front-facing USB-C connector with 15W power output, that can be used for charging mobile devices.

This device has a 40% reduced footprint compared with a regular desktop PC, saving desk or floor space, and is even smaller than the previous generation ThinkCentre M720s desktop.
