

Data Sheet

eBlocker Pro (1 Year Updates)

eBlocker Pro (1 Year Updates) is a smart device that is connected to your home network. It anonymizes your online behavior and ensures that only information is passed on – that you really want to. No software installation or configuration is needed: It blocks ads, stops trackers and hides your IP address on all devices and all browsers. That differentiates eBlocker from conventional browser plugins against trackers and online advertising. The product itself does not gather any data after connection. Simply connect it to your home network, turn it on and your privacy is protected instantly.

eBlocker Pro (1 Year Updates) is the complete plug & play privacy solution for web surfing, where all users share a collective Whitelist.

- Incl. 1 year daily updates for free
- 1 shared user account for all users
