

Quilo™

Fan with Evaporative Cooler & Humidifier

The Quilo™ QEIS is a Fan with Evaporative Air Cooler and Humidifier, all rolled into one. The Quilo™ QEIS gives you the power to recreate a natural lake breeze in the comfort of your own home. With its patent-pending brushless motor technology, the Quilo™ QEIS is designed to minimize energy consumption while maximizing airflow.

Extreme Low Power Consumption
in Quiet Mode: 7.4w*
in Turbo Mode: 36w*

Super Quiet Operation
Sound Level
in Quiet Mode: 24dB*

Powerful Air Flow up to:
359m³ / hr (211 CFM)*

Low Water Alarm

Universal Voltage Adapter:
Easy to travel, easy to store

LED Control Panel & Remote Control

Ice Compartment:
Innovative fountain design
for faster cooling with ice

Advanced Irrigation System:
For optimum evaporative
cooling

Water Tank Filter: Helps
extend the life of the
Honeycomb Cooling Media

Comfort Light: A low-energy
comfort light during the night

Model: QEIS

Product Dimensions (in): 9.8 (W) 12.4 (D) 28.9 (H)
Net Weight: 13.2 lbs / 6 kg

The Power of Evaporative Cooling

When you add water in the tank, Quilo™ QEIS evaporative cooling technology rapidly reduces the temperature of incoming warm air, creating a refreshing cool breeze. A fan simply recirculates warm air. In Evaporative Cooling mode, the Quilo™ QEIS can rapidly reduce the temperature of incoming warm, dry air through the process of evaporation, creating natural cool air output. Imagine that amazing comfortable cool breeze you feel when standing near a lake or sea.
