

Memory Cards

**microSD Class10 UHS-I U3  
with card reader USB 3.0**

Memory  
cards

## Get the best from your last generation devices!

- The class-10 memory card offers incredible performance that compliments the downloading, transferring and sharing of apps, photos and videos
- 32 or 64GB storage capacity to save a large selection of media content without compromising on speed
- The impressive 90Mbps write speed to save HD content without the mind-numbing wait
- Ideal for high speed continuous shooting, full HD, 3D or 4K videos
- USB 3.0 single Card Reader with highest performance to enjoy the best transfer rates of the SPEEDIN' cards

# Why a 4K SD/MSD card?

## What are the uses?

### 1. For GoPro:

To consistently achieve the best results with a GoPro camera, a minimum speed rating of Class 10 is required for 4K (write speed: 10MB/s). The best speed rating for a GoPro camera is achieved with a Class (UHS) U3 tailored to 4K (write speed: 30MB/s). Speedin' cards are Class (UHS) U3 and a great solution for GoPro cameras.

The HERO camera sold by GoPro supports up to a 32GB card, all other GoPros up to 64GB.

### 2. For reflex cameras:

For high-speed continuous shooting with a camera, such as action scenes or sports, Speedin' cards are recommended.

The 90Mbps write speed content to save without the mind-numbing wait.

### 3. For Gaming:

Speedin' cards up to 32GB are ideal to use with Nintendo consoles (Wii U, Wii, 3DS).

These consoles need high performance storage devices to store and transfer video games.

### 4. For set-top box:

Several set-top boxes are now available on the European market that support 4K definition.

For instance, Free has launched its "Freebox mini 4K" with an SD slot to read all 4K multimedia content and display it on a big screen.

Use-oriented packaging with indications of recommended devices that can be used for an optimal experience.  
Cardboard packaging with 360° product view thanks to the transparent and transversal plastic window!

## Product specifications

Read speed	Up to 95 MB/s*
Write speed	Up to 90 MB/s*
Compatibility	<b>microSD cards:</b> 32GB: Compatible with all devices supporting microSDHC and microSDXC standards. 64GB: Compatible with all devices supporting microSDXC standards.  <b>USB READER 3.0</b> High performance
Capacities	<b>microSD cards:</b> 32, 64GB
