## AUDIO BURN-IN

Burn-in is the process for exercising new audio equipment. Most headphones require at least 40 hours of burn-in time to reach their optimal performing state. The main purpose of the burn-in process is to loosen the diaphragm of a newly crafted headphone and to stress the headphone driver. Most audiophiles agree that the sound quality will be noticeably improved after burn-in.

**Burn-in your audio equipment with the JLab Audio app available on the App Store and Google Play**  
Or download our burn-in method at: [jlabaudio.com/pages/audio-burn-in](https://jlabaudio.com/pages/audio-burn-in)

## INSTRUCTIONS FOR USE

- 1 Lower the volume on your audio device.
- 2 Gently insert the earbuds into your ears.
- 3 Gradually raise the volume to a comfortable level.
- 4 In order to block outside noise, position the earbuds so they form a seal inside your ear.
- 5 Test the various gel tip options to find the best fit.

**If there is any exposure to moisture, the internal components may become damaged.**

**It is best practice to air dry before charging.**

## CAUTIONS

- Avoid getting moisture or liquids into the tip of the earbuds or charging port.
- Avoid extreme heat, cold, and humidity.
- Avoid dropping or crushing the earbuds, stressing the cable by rapid pulling or extreme force, or bending the cable at a sharp angle.
- Wax may build up in the earbud tips, lowering the sound quality. Carefully remove the wax with a cotton swab or other small tool to improve the sound quality.
- If you experience discomfort or pain, try lowering the volume or discontinuing use temporarily.
- If you experience regular discomfort while using this product, discontinue use and consult your physician.
- We recommend you treat your earbuds as you would a nice pair of sunglasses and keep them in safe location when not in use.
