

Philips Sonicare FlexCare Platinum Connected Sonic electric toothbrush with app

Personalized coaching

Smart brushing sensors
3 modes, 3 intensities
2 brush heads

HX9192/01

Smart brushing. Superior results.

Up to 10x more plaque removal and healthier gums*

FlexCare Platinum Connected takes the guesswork out of oral care. Sensors send your brushing data to the Sonicare app via Bluetooth® wireless technology, providing you personalized coaching and feedback for the most complete clean possible.

Track your brushing with real-time guidance

- Track and improve your coverage
- Alerts you when you're brushing too hard
- Teaches you to reduce your scrubbing

Sonicare app delivers personalized feedback

- A second chance to clean the spots you miss with TouchUp
- The coaching you need to refine your routine
- Start taking better care of any trouble areas
- Always know the effectiveness of your brush head

Philips Sonicare's deepest, most complete clean

- A customized brushing experience
- Contours to teeth and gums for a deeper clean
- Timer helps encourage thorough brushing
- Dynamic cleaning action for better oral health
- Designed to fit your lifestyle

Highlights

Location sensor

FlexCare Platinum Connected's location sensor shows where you're brushing too little for better coverage. If there are spots you consistently miss when you're brushing, the location sensor will bring them to your attention.

Pressure sensor

You might not notice if you're brushing too hard, but your FlexCare Platinum Connected will. If you apply too much pressure, the intuitive pressure sensor will make the toothbrush handle gently pulsate so you know exactly when to adopt a softer touch. In studies, 7 out of 10 aggressive brushers successfully reduced their brushing pressure thanks to the pressure sensor.

Scrubbing sensor

With an electric toothbrush you let the toothbrush do the work, rather than using a scrubbing motion. FlexCare Platinum Connected has a scrubbing sensor that helps guide you to reduce scrubbing for optimized technique and a more gentle clean.

Touch Up

If you happen to miss any spots during a brushing session, the Philips Sonicare app tracks your coverage and gives you the opportunity to go back for a second pass. TouchUp provides customized guidance based on your personal brushing data so you can immediately address any missed areas and achieve a more complete clean.

Personalized coaching

FlexCare Platinum Connected lets you set daily goals and track your progress. The Sonicare app maintains a running history of your brushing data, so you can easily review your performance. With personalized coaching, tips and alerts from the app, your brushing technique will improve over time. You can even share your progress report with your dental professional.

Focus areas

If your dental professional identifies specific spots in your mouth that need more attention due to plaque buildup, gum recession or another issue, FlexCare Platinum Connected

can help you tackle those trouble areas. You can highlight these spots in your personalized mouthmap within the Sonicare app, reminding you to give them the extra care they need each time you brush.

Brush head performance monitor

Over months of normal use, brush heads gradually wear down and lose their stiffness. The Sonicare app includes a smart brush head performance monitor to track your brush head effectiveness based on your actual brushing time and pressure. It tells you when to replace your brush head so you continue to get the best results. You even have the option to order replacement brush heads right from within the app.

Three modes, three intensities

With three intensity settings and three cleaning modes, FlexCare Platinum Connected offers optimal comfort with a truly deep clean. Use Clean mode for a superb everyday clean, or White mode for stain removal. If you need to pay extra attention to trouble spots, Deep Clean mode delivers exceptional results. Set the intensity to Low, Medium or High according to your personal preference. Set the intensity level to high for best results.

Specifications

Modes

- Clean: For exceptional everyday clean
- White: Removes surface stains
- Deep Clean: For an invigorating deep clean
- 3 intensities: Low, Medium, High

Items included

- Handles: 1 FlexCarePlatinum Connected
