

## Subblue US Inc.

Subblue is a professional team focused on DPV (diving propeller vehicle), underwater drones, and robots.

Subblue has developed a wide range of core technologies such as precise underwater balance control systems, an integrated propeller-motor system which generates much stronger power than conventional designs, and other patented technologies.

Based on these technological capabilities, Subblue has been developing a series of innovative products for water sports and recreation.

Subblue is devoted to meet the consumer's growing needs in a new generation of intelligent products, and bring the underwater world

Unlimited World.....
