Motion Detector

Home security beyond the front door

Ring Video Doorbells began a Ring of Security around your entire property.

Ring Protect is the security system that takes the Ring of Security a step further giving you another level of protection for your property.

Now, you can arm and disarm your system, prevent crime and protect your home - all from your phone, tablet or PC.

Ring

Mounting
bracket

2.

Set up
your Ring
Motion
Detector
in the Ring
app.

Set up your Ring Motion Detector near your Base Station

In the Ring app, choose **Set Up a Device**.

Choose **Sensors**, then **Ring Motion Detector**, then tap **Add Device**.

3.

Connect
your Ring
Motion
Detector
to your
base
station.

Pull the tab on the detector

This connects the battery and turns on the device.
Your base station will find it.

Scan the QR Code or enter the S2 PIN

The QR Code and PIN can be found on the back of your device, on the box, or on the card in this box.

Track the connection progress of the sensor

Your sensor will try to connect to your base station. The sensor's LED ring will show the progress.

Here are some common LED patterns:

Waiting to connect		Blue Blinking (30 sec)
Connected		Blue Solid (5 sec)
Couldn't add to base station		Blue Blink (5x, quick)
Motion detected		Blue Blink (1x)
Sensor tampered		Blue Blinks (3x)

4.

Install
your Ring
Motion
Detector
on the
wall.

Place your detector (but don't install it yet)

Hold the detector where you want to install it. Make sure the detector detects motion in the whole area.

Install your detector.

Use the bracket and tape or screws included in your kit. The detector can be mounted flush to the wall or angled in a corner.

View detector history in the Ring app

You should have a few history events from installing your detector. Check your app to make sure it's working.

5.

Some
additional
details
about
your
detector.

How to change the battery

Your battery should last quite a long time, but when you need to replace it, press the clip and remove the detector cover.
