

NEW PRODUCT

RoadKill FAST Rings

RoadKill FAST Rings solve the problem of acoustically coupling aftermarket speakers to factory speaker openings. It's a laser cut foam product with industrial-grade, peel away adhesive backing.

FAST Rings DNA

- Gasket for speaker mounting to the baffle plate surface
- Middle ring to mount around the outer edge of the speaker
- Circular foam pad goes behind the speaker to absorb unwanted reflections on hard surfaces, such as inside a car door

By using the 3-ring approach the kit improves the projection of the audio into the car cabin and reduces unwanted rear reflections that can degrade the sound.

BENEFITS

- Increase mid bass
- Reduce panel vibration
- Minimalize destructive wave interference
- Help prevent front and rear wave cancellation

SKUS

RKFR6	fits 6" Speakers
