PACKAGE CONTENTS
• Digital outdoor antenna • Power inserter
• Coaxial cable • AC Adapter
• Installations kits for wall and pole mounting
• Quick Setup Guide

WARNING: INSTALLATION OF THIS PRODUCT NEAR POWER LINES IS DANGEROUS. FOR YOUR SAFETY, FOLLOW THE INSTALLATION DIRECTIONS.

MOUNTING TOOLS
If mounting to a wall, roof, or another surface, you’ll need a:
• Drill with 5/16” drill bit  •  Hammer
• Phillips screwdriver •  Pen or pencil

FEATURES
• 60-mile range for superior reception, even in difficult locations
• Amplifier included to boost weak signals from far away
• Designed for outdoor use—resistant to summer and winter elements
• Full kit of installation parts included for mounting to exterior walls, roofs, attics, poles, or other surfaces
• Works with 4K TVs

MOUNTING YOUR ANTENNA

Stationary Installation
1. Use the base plate to mark the drilling positions.
2. Use an electric drill with a 5/16” drill bit to drill four holes that are 1.8 in. deep, then clean the holes.
3. Use a hammer to insert the wall anchors (6) into the holes, then attach the pedestal to the wall with the large screws (6).
4. Place the stand tube into the pedestal, then adjust its position and attach with the screws (2) and hex nuts (2).
5. Use a hammer to insert the wall anchors (4) into the holes, then attach the pedestal to the wall with the large screws (4).
6. Place the antenna on the base plate, then fasten with the plastic cap screws (4).

Flexible Installation
1. Use the pedestal to mark the drilling positions.
2. Use an electric drill with a 5/16” drill bit to drill six holes that are 1.8 in. deep, then clean the holes.
5. Attach the base plate to the stand tube with U bolts (2), washers (4), and wing nuts (4).
6. Place the antenna on the base plate, then fasten with the plastic cap screws (4).
CONNECTIONS

Connecting Your Antenna

This antenna can be connected directly to an HDTV, a digital converter box, or a set-top box.

CONNECTING TO POWER

- Make sure your TV is turned off before you connect the power inserter.
- Connect the power inserter’s coaxial connection to the coaxial jack on your digital converter box or set-top box (both are not included).
- Connect the included coaxial cable to the power inserter, and then connect it to the antenna.
- Note: Please place the antenna input voltage at DC 5V, under the correct position.
- Connect the antenna’s coaxial connection to your digital converter box or TV, and plug it into a wall outlet.

SCANNING FOR CHANNELS

1. Open your device’s setup menu, then select the “scan” or “channel scan” option. Your device automatically searches for available channels in your area.
2. The antenna’s range will vary depending on a wide range of environmental and geographic factors. The antenna’s performance can be determined by turning off the equipment and leaving the antenna in its position, then observe its signal strength indicator. Some TVs have a signal strength indicator. See your TV manual to see if your TV has this feature.
3. Keep the antenna away from sources of interference, such as air conditioners, hair dryers, and microwave ovens.

TROUBLESHOOTING

• Increase the separation between the equipment and receiver.
• Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
• Consult the dealer or an experienced radio/TV technician for help.

SPECIFICATIONS

- Antenna Input Voltage: DC 5V
- Antenna Input Voltage: DC 5V
- Antenna Input Voltage: DC 5V
- Amplifier Gain: VHF 25±3dB
- UHF 25±3dB
- VHF Range: 174-216 MHz
- UHF Range: 470-862 MHz
- UHF: 24±3dB
- VHF: 24±3dB
- Coaxial cable length: 25 ft. (7.62 m)
- Antenna input voltage: DC 5V
- Power input:
  - UHF: 24±3dB
  - Input: AC 100-240V
  - Output: 12V, 80mA

TROUBLESHOOTING

PROBLEM:

- Make sure that you are connected to a TV or set top box with an ATSC tuner.
- Go to the menu on your TV or set-top box, and rescan the channels.
- Make sure that the power inserter is properly installed and is powered on.
- Your antenna may be too far from the broadcast antenna to receive channels. Adjust your antenna, then scan for available channels on your TV.
- Keep the antenna away from sources of interference, such as air conditioners, hair dryers, and microwave ovens.
- Your antenna may be too far from the broadcast antenna to receive channels.
- Scan for available channels on your TV.
- Your digital outdoor antenna will not upscale to HD if the TV is not capable of performing a 1080p scan.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.
