

FeelWorld FWP173-9HSD Overview

*Featuring a full-HD IPS LCD panel, the **FeelWorld P173-9HSD 17.3" Broadcast LCD Monitor** can be used for 4K, HD, as well as SD workflows in studio, broadcast, and other professional video applications. The rear panel contains SDI, HDMI, DVI, component, and composite inputs, and outputs are available for SDI, HDMI, component and composite. The HDMI input will accept both DCI and UHD 4K signals for high-resolution productions. A separate audio input for analog stereo audio is available via RCA connections. A tally input can be used for studio integration.*

Professional monitoring tools such as focus peaking, markers, monochrome, R/G/B-only, pixel-to-pixel mapping, and image flip are built-in for analyzing your video and ensuring a proper image. A V-mount plate is built into the back for powering in the field, away from a mains source. If shooting outdoors attach the included sunhood for optimal contrast. A U-bracket is also included for convenient tabletop mounting.
