

DC720 Dash Cam

Virtual 720° Dual-Lens Automotive Video Recorder

Cameras capture everything from driver to the road. Equipped with G-sensor technology, the DC720 automatically starts recording when an incident like hard braking or a collision is detected. Combine that with a dual lens that captures activity both inside and outside the car, and you can rest assured that you won't miss a thing. The road can be a risky place. Make sure you get the whole picture with the Uniden DC720.
