- Lens clip
- 3 lens cap sets
- Soft carrying pouch
- *Quick Setup Guide*

## FEATURES

- Universal design fits a variety of phones and tablets (even with a case installed)
- Can be used on front or rear camera
- Macro lens captures detail in close-up photos
- Wide-angle lens captures the entire scene
- Fisheye lens creates extremely wide shots with a dramatic depth of field

Before using your new product,  
please read these instructions to prevent any damage.

## SELECTING A LENS

**Macro:** Captures more detail (10x) in close-up photos. Ideal for flowers, insects, and jewelry.

**Note:** Focusing is only possible within a few inches of the subject. Macro lens cannot be used for standard pictures at further distances.

**Wide-angle:** Captures 30-50% more than a normal phone camera. Ideal for landscapes or tight indoor shots.

**Fisheye:** Capture extreme ultra-wide photos with a dramatic depth of field. Ideal for artistic shots of everyday scenes.

Images are representative only.

## TAKING A PHOTO

- 1 Select a lens, remove its caps, then screw the lens onto the clip.

- 2 Squeeze the clip to align the lens over your mobile device's camera.

**NOTE:** If the lens is not aligned correctly, there may be shadows or blurriness on one side of the image.

- 3 Open your photo app, then take a photo.
- 4 When finished, remove the clip, unscrew the lens, then cover with front and rear caps.

## MAINTENANCE

- Take care when cleaning the lenses. They are precise glass lenses and can scratch. If dirt or fingerprints need to be cleaned, first wipe gently with a clean, lint-free cloth. If further cleaning is required, a camera lens cleaning kit can be used. Eyeglass cleaning products are also suitable.
- Do not use harsh chemicals such as window glass cleaner, as they can permanently damage the lenses.
- Do not submerge lenses in liquid for cleaning, as water can be permanently trapped inside the lens.
