

Designed to keep up with the most challenging 'on the go' lifestyle, the BlackBerry® Motion has been made to last longer, go further and work more effortlessly.

BUILT TO LAST

- **PREMIUM ANTI-SCRATCH DISPLAY**

Enjoy brilliant colors on a 5.5-inch Full HD screen and keep it looking sharp and professional thanks to a premium, nano-diamond anti-scratch display coating protecting you for everyday use.

- **WATER AND DUST RESISTANT**

The first splash and dust-resistant BlackBerry smartphone, the BlackBerry Motion sports an IP67 rating that protects against spills, splashes and dust; perfect for busy days and adventurous weekends.

- **TWO-DAY BATTERY LIFE**

The largest battery ever in a BlackBerry smartphone, the 4000mAh battery can go up to 32+ hours of all day to all night battery power in a single charge; with Quick Charge 3.0 and Boost mode for faster charging when you're on the go.

THE FAST WAY TO GET STUFF DONE

- **SMART CONVENIENCE KEY**

Customize the Smart Convenience Key to instantly bring up apps and functions you use most often based on your location or what you are up to. For example, in the car you can program the key to launch your favorite music app; at home, press to launch the camera; at work, to compose a new email.

- **FINGERPRINT SENSOR**

BlackBerry Motion's home button doubles as a perfectly placed fingerprint sensor for easy device unlocking. It can also be used to gain access to your Locker and take photos on Locker Mode or to confirm purchases you make from your device.

PROTECT THE PRIVATE DETAILS OF YOUR LIFE

- **LOCKER**

Hide photos, private messages and confidential documents in your personal Locker - an encrypted, secure zone that can only be accessed with the fingerprint sensor or your password.

- **LOCKER MODE**

Not all pictures are meant to be shared. On Locker Mode, you can take photos of weekend escapades, private selfies or confidential documents with the fingerprint sensor and these images are password-protected, and not uploaded to the cloud.

- **BLACKBERRY® PRIVACY SHADE**

Privacy Shade prevents people around you from seeing your screen by blocking out everything except for a small viewable area that you control; perfect for when you're out and about while working with confidential information.

- **PRIVACY FLIP CASE**

The Privacy Flip Case (sold separately) provides peep-proof access to your screen while giving you full touch access to your device.

IMPRESSIVE PHOTO QUALITY

- **GREAT IMAGING EXPERIENCE**

The BlackBerry Motion features a 12MP auto-focus camera that captures sharp, crisp photos in any light. The wide aperture lens with large pixels and dual-tone flash ensures your photos have superior color and clarity. Take crystal clear selfies and join conference calls on the go with the 8MP front camera with fixed focus, LCD Flash, and 84-degree wide angle lens. Plus, now you can save digital copies of documents, business cards or receipts with the built-in scanner.

Water and scratch-resistant display

World's first nano diamond anti-scratch display

4000mAh battery with 32+ hours of battery life, with Quick Charge™ 3.0 and USB-C charging
