

Back Box for CI 600 6" in-wall speakers

The Bowers & Wilkins BB6W back box increases sound insulation to adjoining rooms and provides the fire safety barrier often required by building regulations. When used in solid construction, the back-box will define an appropriate working volume for the speaker which may need to extend beyond the boundaries of the wall frame.

- Backbox for CI 600 6in In-Wall Speakers
- Meets fire safety building regulations
- Reduces unwanted sound leak to neighboring rooms
- Further Improves sound performance
