More Than Just a Baby Monitor

Hubble Connected's innovative Nursery Pal Dual Vision Smart Monitor Camera gives parents a whole new outlook when monitoring their baby. It is the only monitoring unit on the market featuring both a wide-angle and regular view which simultaneously provides close-up and wide-angle viewing, along with AI Motion Tracking, allowing parents to get a comprehensive view of their baby and the room. Nursery Pal Dual Vision's AI Motion Tracking means once the baby is recognized as the selected person, your high-definition view will automatically pan and tilt to effortlessly keep them in-frame. Parents can view the live stream via the HubbleClub app on their smartphone, allowing you to stay connected no matter where you are, and receive activity notifications when motion or sound are detected. As the baby grows, the ConnectChat™ feature allows for easy two-way communication between parent and child. The multi-purpose camera also lets parents soothe their little one to sleep through the enhanced, music-grade speaker with a collection of nature sounds, lullabies, and audiobooks.
