

An AirFryer built for the consumer

Starting in 2018 our TOA's have been inspired by consumers' pain points on traditional AirFryers.

Today we've addressed these same issues—this time with a basket AirFryer using a practical consumer-focused approach, quality engineering and intentional design.

Even cooking

Toss reminder prompt and large 9"x9" basket surface area ensures even heating and maximum crisp.

Familiar functions

Includes five top ranked cooking functions and five practical presets for simple and no-nonsense usability.

Food monitoring

Viewing window and interior light to view progress while the food cooks without interruption.

Auto keep-warm

Unit automatically enters keep warm mode (140°F) after cooking is complete. Food stays hot until the user is ready.

Discovering the details

Inspired by the consumer experience.
Thoughtful and intentional features.
Built to be frustration free.
