Incisive Noise Cancellation technology ensures an intimate sound experience in multiple environments

- **EVERYDAY ANC** - Revolutionary comprehensive noise cancelling not only eliminates airplane noise, but a much wider range of noise pollution for everyday use.
- **LIGHTNING CONNECTOR** - MFi certified lightning digital technology + a hi-definition DAC delivers lossless audio made specifically for your Apple® iPhone.
- **5-IN-1 CONTROLLER** - With a single five-directional button you can make crystal clear calls, activate voice control, adjust volume, and change tracks effortlessly.
- **DUAL DRIVER SOUND** - One balanced armature (like a mini-tweeter) + one dynamic driver (like a mini-speaker) delivers an extremely accurate and intimate listening experience.
- **TUNED TO PERFECTION** - Expertly tuned by Grammy® winning sound engineer Luca Bignardi to represent your favorite artist's sound.

We still care about the sound we're not cancelling
