### Maintenance Guide

To maintain long term performance and easy gliding of your solid wood drawers, we recommend applying wax to the wooden guide rails.

1. Bee's wax is recommended or Paraffin wax from a standard candle can be used.
2. Apply the wax by rubbing it on the wooden guide rails where there is wood-on-wood contact when opening and closing the drawer. (Wax should be room temperature, do not melt the wax onto the wood)
3. Wax should be applied every few months for the first year and then only when needed after that to keep the drawers sliding smoothly.
