SC-619 HIGH DIGITAL TV ANTENNA USER GUIDE

The SC-619 antennas are high definition TV receiving antennas that can receive HDTV, SDTV, RCA's DTTV and analog TV signals. SC-619 is designed for the most elegant and the most clear definition picture, and it is easy to assemble and use. Before using, please take out all the parts (magnetic base, cable and stick) from the box and read this manual.

1. Specifications

Operation Frequency: 470-862MHz	Gain: 3.5dBi Max
Impedance: 75Ω	VSWR: 3.0:1
Indoor and Outdoor Use	

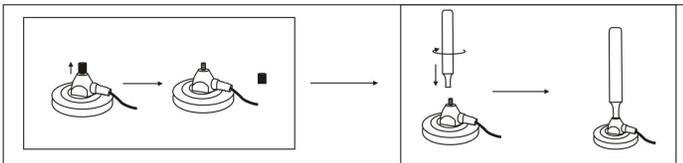

2. Finding the best location for the antenna

Before connecting the antenna, determine the best spot for optimum reception. Try as much as possible to avoid obstructions between transmitters and your antenna.

Note: Generally speaking, the best location for the antenna is close to a window.

3. Assembling antenna

Take out all the parts from the box and assemble them as shown in the picture.

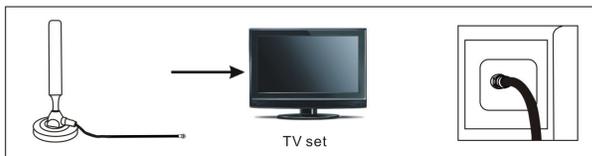

picture 1

4. Connecting the antenna to the TV

① Antenna connected to the TV directly

Insert the Antenna output cable connector into the TV antenna input directly. (Shown in picture 2)

picture 2

② Antenna connected to STB (Set-Top-Box) then to TV.

First, please correspondingly connect the antenna output cable to the antenna input socket of STB. And then, connect STB output cable to the antenna input of TV set. (Shown in picture 3)

Troubleshooting

I have my TV in a metal cabinet. Will the antenna work for me?

Any large metal objects will prevent antenna signal from receiving the antenna. You must place the antenna outside or above the metal cabinet.

Can I use the antenna in basement?

TV signals usually cannot penetrate into basement locations due to their lower elevation.

Please Note: Other variables, which are not related to antenna performance, can effect your reception. These include distance from the source transmitting the desired station, and manmade and natural conditions. Example: Obstacles such as buildings between the transmitting source and your antenna.

5. Warranty terms

Supersonic INC offers the owner of this product a warranty of one year from the date of purchase against all manufacturing defects in materials and workmanship.

- ① Customers must insist to be trained on products operations prior to purchase. Damages as a result mishandling or failure to follow instructions will not be covered by this warranty.
- ② This warranty is a quality assurance warranty and only applicable for repair and service as stated and not product replacement.
- ③ Transport charges to Supersonic INC service centre is incurred by the customer or the dealer.

Troubleshooting Tips:

If not able to get local stations it can be due to Poor reception in your area. Find out where the broadcast towers are located in your area. Aiming your antenna to TV transmitting towers can improve reception.

For best reception:

Place the antenna in or near a window.
Place it as high as possible.
Rescan for channels in a different room or location.
Use an Antenna Extender To Reach Window.
Face it in the Right Direction.
Move or place Higher Up – HIGHLY RECOMMENDED!
Put it in a Skylight – HIGHLY RECOMMENDED!
