86" AIR CUSHION
LIGHT STAND

QUICK SETUP GUIDE

USING YOUR LIGHT STAND

- 1 Loosen the leg position knob.

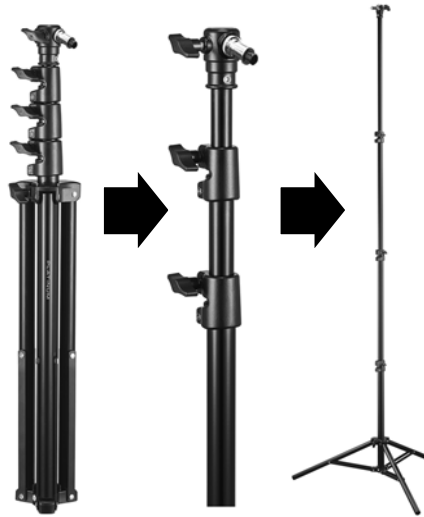

- 2 Pull outward on the legs and set upright.

- 3 Move the legs to the position you want, then tighten the leg position knob.

- 4 Loosen each section knob, then extend each section to the length you want and tighten the knobs.

- 5 Attach your studio light, flash head, umbrella, or other device to the mounting screw.

IMPORTANT SAFETY INSTRUCTIONS

- To prevent damage to your lighting equipment or injury to you or others, read the following safety precautions before using the stand.
- Read and understand all instructions before using.
- Keep these instructions.
- Close supervision is necessary when any appliance is used by or near children. Do not leave the stand unattended while in use.
- Do not place the light stand on an uneven surface. Your stand may tip over and cause property damage or personal injury.
- For additional security, add weighted bags to the base for extra stability.

Note: Do not exceed the 20 lb load capacity of this light stand. Avoid mounting heavier or unbalanced loads on the stand to prevent an accidental fall, bodily injury, or damage to your equipment.
