Peace of Mind Starts Here

The team at Hubble Connected is thrilled to introduce Hubble Guardian Pro, the newest innovation in smart nursery technology. This sleek, wearable device allows you to track your baby's heart rate, oxygen level, body temperature change, and movement from your compatible smart device. The Guardian Pro sensor is designed with a soft fabric strap that is easily adjustable to provide a comfortable and secure fit on your little one's ankle. When it is time to charge, easily remove Hubble Guardian Pro and place it on the charging dock.

As the ultimate nursery solution that grows with your baby, Guardian Pro comes with a complimentary touch screen parent unit preloaded with our famous Hubble Baby Mode. Watch as your little one enjoys educational games, engaging videos, and fascinating picture books. While they rest, you can use the touch screen viewer to stay connected to what matters most. Pan, tilt, and zoom to keep your little one in sight, or soothe them to sleep with our collection of preloaded nature sounds, lullabies, and bedside stories. Control of these features and more on the HubbleClub by Hubble Connected app.

Hubble Guardian Pro. Peace of Mind Starts Here.
