Product name

VTech RM5752 Wi-Fi Remote Access Video Baby Monitor with 5" 1080p HD Camera, Automatic Night Vision & 1 Camera, White

Product description

The VTech RM5752 Wi-Fi Remote Access Video Baby Monitor allows you to check in on your little one from virtually anywhere—at home or remotely on your smart device. The HD camera uses your home's Wi-Fi connection to capture movements and sounds. Watch your child in real time on the parent unit, or on the MyVTech Baby app. When viewing on your iOS or Android device, experience crystal-clear, high-definition video. The two-way talk back feature allows you to comfort your baby from the parent unit or your smart phone.

The VTech RM5752 Wi-Fi Remote Access Video Baby Monitor features soothing sounds and lullabies that play right from the camera unit to help baby sleep tight. This fixed baby camera has a wide-angle viewing up to 120 degrees to watch over your little one from anywhere in the house or out in the yard. Even after dark, you'll be able to see your baby clearly thanks to automatic infrared night vision. Use voice commands to view the RM5752 camera on compatible Alexa and Google Assistant devices.
