for assistance with
your appointment.

4 EASY STEPS

1 Measure the area for your fitness equipment.

DESIGNATED AREA	WIDTH	CEILING HEIGHT	DISTANCE TO OUTLET
<i>Example: Spare bedroom</i>	12'x12'	9'	3'

Don't forget:

- Ensure that you have a reliable WiFi signal, strong enough to stream audio and video.
- For wall mounted equipment, ensure you have the required in-wall support.

2 Record your new fitness equipment dimensions.

EQUIPMENT TYPE	WIDTH	DEPTH	HEIGHT	MAX HEIGHT	CORD LENGTH
<i>Example: Treadmill 2000</i>	3.25'	6.5'	5.5'	6'	4'

Don't forget:

- Account for user height on the piece of equipment.
- Account for max incline on equipment, if applicable.
- Account for height of product when folded up, if applicable.
- Off equipment exercise will require additional space.

3 Complete the experience.

- To help protect your flooring, consider purchasing a protective mat fit for your equipment.
- Studio cycles may require specific footwear. Check product details to find compatible solutions.
- Account setup and coaching subscription varies by product; find more information on BestBuy.com or work with your Geek Squad® Agent at installation.

4 Prepare your home for delivery.

- Know the arrival window for your appointment and ensure adequate parking space is available.
- Secure pets during your appointment.
- Clear a path from the street to the product's location in the home: this includes removal of snow and ice, opening gates and moving furniture and fragile items.
- Ensure there is enough room to maneuver the product into the designated area, including turns and doorways.
- Product can be carried up to the third floor. If the product is being delivered to a fourth floor or above, ensure a functioning elevator is available.
- An adult, age 18 or over (19 or over in AL or NE, 21 in Puerto Rico), with a valid government-issued photo ID must be present during the duration of the appointment.
