

Low Voltage 16GB (2x8GB) PC3-12800L 1600MHz DDR3L Notebook SODIMM

Boost the performance of your PC. PNY memory upgrades will prove to be an outstanding value now and in the future.

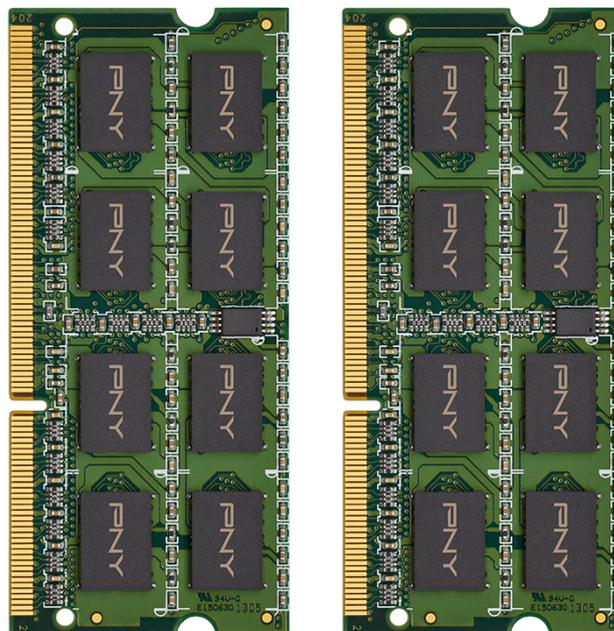

DDR3 is the next generation of DDR memory. DDR3 memory features faster speeds, greater bandwidth, lower power consumption and enhanced thermal performance. Although DDR3 modules are the same physical dimension as DDR2 and DDR modules, the plug-in connector configuration is different and as such DDR3 modules are not compatible with PCs requiring DDR2 modules, and vice-versa.

Specifications

- PC Type/Memory Type : Low Voltage Laptop DDR3L
- Capacity : 16 GB (2x8GB)
- Frequency Speed (JEDEC): 1600 MHz (PC3-12800L)
- Cas Latency : CL 11
- Voltage : 1,35v

Features & Benefits

- Warranty : 10 Years

INDIVIDUAL SKU DESCRIPTION

16GB (2x8GB) PC3-12800L 1600MHz DDR3L Notebook SODIMM MN16GK2D31600LV
