

## Making your new rental **your own.**

You've found your new rental, whether that's an apartment, a townhome or a single family home. It's time to make it feel like home, and we're here to help. While you may feel limited on what you can change, or how much you can add, with a free consultation, we'll explore your new space and help you discover solutions to make it your own. **Here are 5 upgrades you can start making today.**

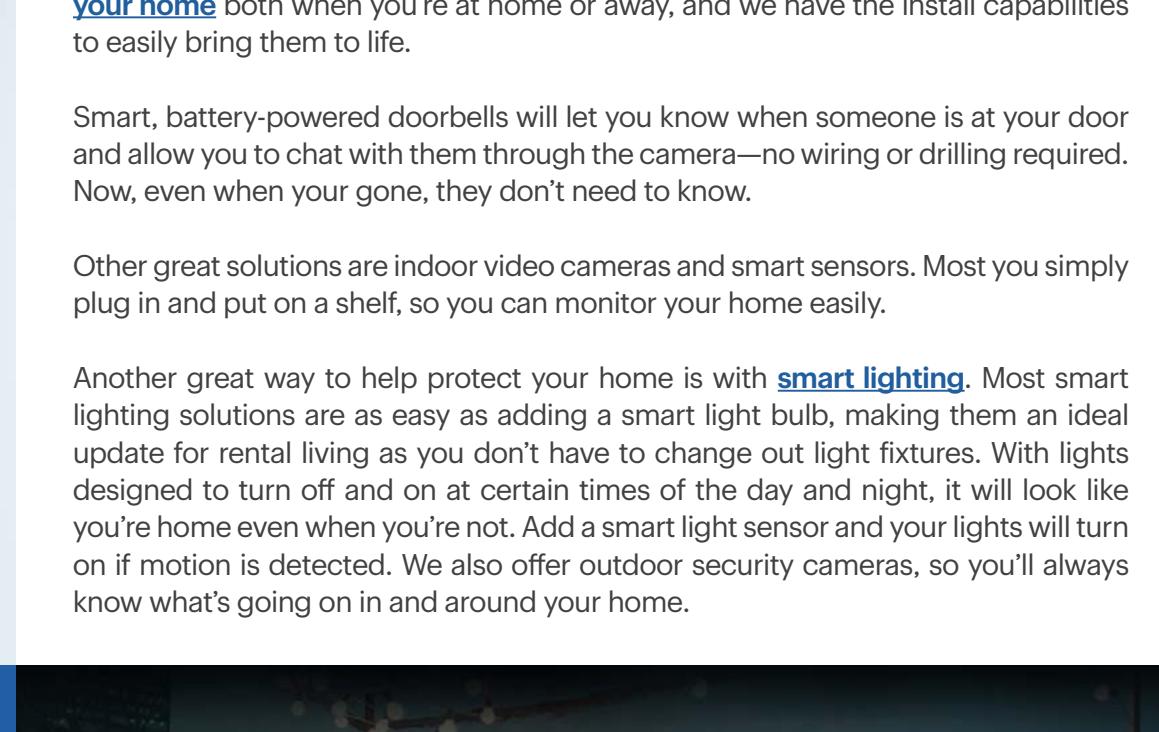

[Schedule A FREE Consultation](#)

### 1. Upgrade the kitchen.

OK, new major appliances are probably not an option, but we still have lots of ways to bring exceptional cooking and baking solutions to your new kitchen, no matter its size.

While counter space may be limited, there are lots of things to bring that morning pick-me-up home. From espresso machines to single-serve coffee makers, not only do these machines give you the bolt of energy you need, they look great. Add an air fryer, slow cooker, microwave, and blender and you're ready to cook up, mix up or warm up whatever you can imagine. Your rental's major appliances might not be ideal, but our [small appliances](#) will make your kitchen one you'll love.

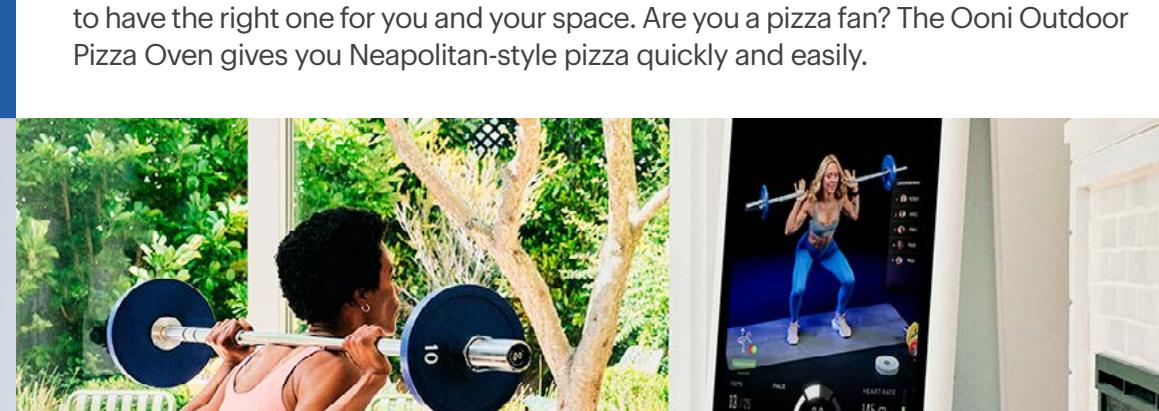

### 2. Add a home theater to any room.

Seriously, we can do this. Depending on the size and space of your family room, any size TV can feel massive... and adding a soundbar or simple surround sound system can bring the movie experience home. Want to step it up a notch? Add an [85-100" TV](#). These large screens rival many projector screens and the quality of picture is truly breathtaking. We'll help you find the right size TV for the right size room, then help you bring the right sound to your room.

Want an even bigger solution? [Short-throw projectors](#) offer the theater experience without having to mount a projector in the room. With a maximum viewing size of upward of 130", it truly is a theater experience. The best part is how simple it is: just place the short-throw projector on a TV-style stand inches from the wall and you're enjoying the movie theater experience, in nearly any room.

Then, if you find a new place in the future, it couldn't be easier to move the short-throw with you. And removal of the short-throw screen or even the removal of a mounted TV is easy with wall repair being little more than what would be needed from hanging a picture.

### 3. Add peace of mind.

Helping keep your new space safe and secure is key. We have [solutions to monitor your home](#) both when you're at home or away, and we have the install capabilities to easily bring them to life.

Smart, battery-powered doorbells will let you know when someone is at your door and allow you to chat with them through the camera—no wiring or drilling required. Now, even when you're gone, they don't need to know.

Other great solutions are indoor video cameras and smart sensors. Most you simply plug in and put on a shelf, so you can monitor your home easily.

Another great way to help protect your home is with [smart lighting](#). Most smart lighting solutions are as easy as adding a smart light bulb, making them an ideal update for rental living as you don't have to change out light fixtures. With lights designed to turn off and on at certain times of the day and night, it will look like you're home even when you're not. Add a smart light sensor and your lights will turn on if motion is detected. We also offer outdoor security cameras, so you'll always know what's going on in and around your home.

### 4. Bring entertainment outside.

While yard space might be limited, a small deck or patio is plenty of room to bring some fun outside. A Home Expert can help you [bring your outdoor spaces to life](#) with the right outdoor technology. Want a deep dive into what's possible? Read our [outdoor entertainment blog](#). Otherwise—here are some tips for smaller spaces.

Portable Bluetooth or wireless speakers can bring big sound to your smaller outdoor spaces. Enjoy the sounds of summer as you relax.

Another easy trick the family is sure to love is bringing a portable projector and screen outside. All you need is an outlet and streaming media stick like the Amazon Fire Stick or Roku, plug it into your projector's HDMI port, and once the sun begins to set, you've got an outdoor movie theater.

How about a grill? There's nothing like a meal cooked over an open flame, and with our tremendous selection of grills, in all shapes, sizes and price ranges, we're sure to have the right one for you and your space. Are you a pizza fan? The Ooni Outdoor Pizza Oven gives you Neapolitan-style pizza quickly and easily.

### 5. Exercise space.

If your rental development doesn't come with a dedicated workout room, you can still stay home and stay fit with some [simple workout solutions](#). A Home Expert will evaluate your space for size constraints, then help you get the gear you need. Some workout gear folds up and can be hidden under a bed, while others, like the Templo, is built and designed for small spaces so any room can be a workout room.

[Welcome to your new rental.](#)

Let us help make it a home by bringing fun, relaxation and joy to every room, both inside and out. From the list of updates above, to smart home solutions, gaming options and bathroom updates, we aim to make every room in your home, your favorite room. And one of the best features of each of these upgrades, if you decide to move, they all easily come with you.

[The updates you make to this space can easily move to your next.](#)
