WRITE WITH LIGHT

Here at Crazy Aaron's, we have our own form of light writing! We used Foxfire, one of our UV Reactive Phantom colors, to make this guide. What kind of art can YOU make with light?

1 Remove your Thinking Putty from the tin, lay it on the table and let it puddle.

2 Using the Glow Charger(TM), draw a design on the putty.

3 Turn off the lights.

4 Watch your design glow in the dark!
