Installing a banana plug

1   Cut the speaker wire evenly to the desired length, then slide the back-end cap onto the speaker wire.

2   Slide the compression collar onto the speaker wire. Use the black collars for smaller (16-18) gauge wire or the white collars for larger (12-14) gauge wire.

3   Slide the banana plug terminal onto the speaker wire so that the terminal's center pin is firmly inserted into the speaker wire.

4   Screw the banana plug terminal and back-end cap together tightly.

One-year limited warranty
