

# charge™

## 2in1 side table

### overview

Turns out, splitting the power may be just the thing to bring a couple closer together. Here, two compact units sit neatly on either side of a sofa or bed, making it a snap to charge phones, lighting, baby monitors – even when the wall outlet they share is hidden far out of reach. Our clever, single-plug solution divides into two cords, separating the power by 10ft, delivering easy access to each user. With this 2in1, you've finally found your separate but equal power bliss.

### highlights

- Easy installation
- ETL listed
- 2.1 amp USB ports
- 15 amps
- Single cord, with 2 desktop power units
- 2 outlets, 4 USB-A ports
