

*How do you get
THE RIGHT TYPE OF HEAT
INTO THE RIGHT PLACE, AT THE RIGHT TIME
for whatever you're cooking?*

The world's first counter top oven with Super Convection that gives you the ultimate control over heat.

Heat where and when you need it.

Element IQ® controls heating elements to move heat wherever you need it, from broiling your salmon skin crispy brown to gently rising soufflés.

Precision meets stability.

Select any temperature between 80°F-480°F for up to 72 hours. Perfect for dehydrating at low stable temperature or roasting on high heat.

Super Convection for crispness.

Generates high heat combined with extreme air circulation, ideal for crispy air frying.

Product Specifications

Capacity	1 cu.ft., 16 x 13.5 x 7 in : Fits standard 9"x 13" baking pan, 12-cup muffin tray and 9 slices of toast.
Super Convection	Greater volume of air to ensure fast and even baking, roasting, air frying and dehydrating. 2-speed fan (regular and Super) for more cooking control.
