### ENERGY-SAVING

The power consumption mainly depends on the processor in use and its load. Using an Intel® Core™ i7-6700 Quad-Core processor consumes about 27W in idle mode. Under full load, the power consumption is 52W (94W respectively).

*Note: The maximum output wattage of the power adapter is specified with 90W. Assuming, the adapter's efficiency is 90%, the input wattage can be up to 100W.*

### KENSINGTON LOCK

This is a small, metal-reinforced hole which is part of an anti-theft system. PN-SPCi7W10S provides an appropriate hole on both sides of its chassis.

The lock-and-cable is not included.

### GRAPHICS

- Integrated Intel® HD530 Graphics
- Video-outputs: HDMI and Dual Displayport
