

What is crypto?

- Digital assets are created with blockchain technology.
- This technology provides a way to store and secure data on transactions without having to trust any third party (companies, banks, or governments).
- All transactions are public and irrevocable, allowing transparency and traceability over transactions.
- Your account consists of a public key, the “address” to receive your funds, and a private key, a confidential access to manage and control your funds.

Cryptocurrencies

- Alternative form of money using coins and tokens.
- Most famous are Bitcoin, Ethereum and Solana.
- Can be exchanged for one another (fungible).

NFT

- Proof of ownership and authenticity of a unique token.
- Can come in form of pictures, videos, songs, tweets...
- Can be sold or traded, but each one is different (non fungible).

Why a hardware wallet?

- Your physical entry within the digital world.
- Your private keys are stored in a secure offline storage disconnected from the internet, far from hackers' reach.
- So that only you can access your crypto assets. Not even Ledger can access them.
- It provides you with self-custody: full autonomy and control over your crypto assets, without having to ask for permission when you want to transfer, swap, sell or send them.

What is Ledger?

- Global solution for crypto and NFTs founded in 2014.
- Over 20% of the world's crypto assets are secured through Ledger hardware wallets.
- Offers you the easiest and safest way to start your crypto journey with your Ledger device and its companion app Ledger Live™.

Why choose Ledger?

Own, control and manage thousands of cryptos and NFTs.

Protect your digital assets at all times with a Secret Recovery Phrase that only you know. If your device is ever lost, you can recover your assets with a Secret Recovery Phrase, a unique 24 word list.

All actions such as details of your transactions can be verified on your device screen, so you can sign them with full confidence.

Can be connected to software wallets without compromising security.

Join Ledger's secure ecosystem

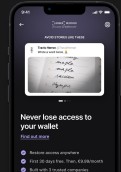

Ledger Live™

Pair your device with our app to buy, swap, stake and manage your crypto at home or on-the-go through services offered by our third-party providers.

Ledger Recover™

Restore your wallet access whenever you need it, even if you lose your Secret Recovery Phrase. Ledger Recover is an optional service that gives you extra peace of mind at all times. Service provided by Coincover.

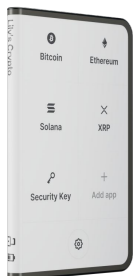

Ledger Academy

Learn abouts NFTs, DeFi and more and earn exclusive NFTs with Ledger Quest, and explore our Ledger Academy for more crypto knowledge.
